# Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

## Summary

Software engineer with 2+ years building scalable **Java and Python backend services**, **REST APIs**, and cloud integrations for education-adjacent platforms serving 500+ users. Experienced with **PostgreSQL**, Agile delivery, CI/CD, and cross-team collaboration with frontend engineers.

## Education

**University of Southern California, Los Angeles, CA** **August 2024 – May 2026**
*Master of Science in Computer Science* *GPA: 3.75/4.0*
Coursework: Database Systems, Software Engineering, Web Technologies, Analysis of Algorithms

**Pandit Deendayal Energy University, Gandhinagar, India** **November 2020 – May 2024**
*Bachelor of Technology in Computer Science and Engineering* *GPA: 3.88/4.0*
Coursework: Software Engineering, Object-Oriented Programming, Operating Systems, Data Retrieval

## Experience

**USC Dornsife** **Los Angeles, CA**
*Software Engineer* *September 2025 – Present*

- Developed **Python/FastAPI backend services** and **REST APIs** for an AI education platform serving 500+ learners, reducing latency from **1.2s to 350ms** through secure, testable code and SQL optimization.
- Built reliable integration pipelines (5K+ monthly jobs) on **Azure/cloud** infrastructure with CI/CD releases, debugging, and performance improvements achieving 99%+ production reliability.

**Grad8** **Los Angeles, CA**
*Software Engineer Intern* *June 2025 – August 2025*

- Shipped **Flask/Python APIs** and backend features supporting 10K+ daily requests, collaborating with frontend engineers on end-to-end delivery, code reviews, and Agile sprint execution.
- Resolved production defects and improved application stability by **60%** through structured troubleshooting and maintainable service design.

**USC AD Labs** **Los Angeles, CA**
*Software Engineering Assistant* *January 2025 – May 2025*

- Implemented backend data services across 100K+ records with reproducible tests and documentation, supporting scalable processing and team-based engineering quality standards.
- Participated in technical discussions and iterative delivery, communicating trade-offs clearly across collaborators.

**Aasma Technology Solutions** **India**
*Software Developer Engineer - (SecureSync)* *August 2023 – July 2024*

- Engineered **Java/Python microservices** and **REST integrations** on **AWS**, improving API response time by **30%** with clean OOP design and relational data workflows.
- Maintained **20+ automated test suites** and Jenkins **CI/CD** pipelines, increasing deployment reliability by **68%** in Agile Scrum teams.

**Aasma Technology Solutions** **India**
*Backend Developer Intern - (VibrantChem)* *May 2023 – August 2023*

- Built **Node.js/REST backend modules** with **MongoDB and PostgreSQL** data layers, supporting real-time integrations and API consumption patterns for web client teams.
- Automated **Docker** build/deploy workflows with Jenkins, cutting release cycles by **50%** and improving operational excellence across environments.

## Skills

**Backend**: **Java**, **Python**, FastAPI, Flask, Spring Boot exposure, REST API design, microservices
**Data**: PostgreSQL, MySQL, MongoDB, SQL Server, schema design, query tuning
**Cloud & Delivery**: AWS, Azure, Docker, Jenkins CI/CD, Git, Agile/Scrum, secure/testable code practices

## Projects

**Chat2SQL** Code | *Java, TypeScript, SQL, Docker*

- Built a **Java backend** with REST-style services and multi-database integrations (PostgreSQL, MySQL, MongoDB), demonstrating API design and cross-platform deployment workflows.

**Linguistix** Code | *Python, AWS, Docker, CI/CD*

- Developed a **Python API service** on AWS with automated pipelines, validation gates, and cloud-native deployment practices for reliable backend operations.

**StudyHub** | *Python, FastAPI, PostgreSQL, EdTech APIs*

- Created an education-focused backend prototype with learner data models, REST endpoints, and integration patterns supporting student workflow applications.
