Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Technical professional with 2+ years translating complex software into clear business value for stakeholders. Experienced in **discovery sessions**, **technical presentations**, **solution demos**, and **API/integration** discussions. Quick learner with strong product curiosity, cross-functional collaboration, and passion for operations-driven industries.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Software Engineering, Database Systems, Web Technologies, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Software Engineering, Database Management, Web Development, Data Structures

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Partnered with product and business stakeholders to understand requirements, lead **discovery sessions**, and deliver **technical presentations** aligned to operational goals and ROI.
- Prepared tailored **solution demonstrations** and documentation for platform capabilities, skillfully answering technical and functional questions on **APIs**, integrations, and cloud architecture.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Supported cross-functional teams (engineering, product, customer success) by translating client pain points into technical strategy and positioning platform features to meet business needs.
- Delivered demo-ready workflows and integration prototypes using **REST APIs**, improving stakeholder confidence during evaluations and proof-of-concept cycles.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*
- Communicated complex technical concepts to non-technical audiences through clear presentations, reports, and walkthroughs in a collaborative, team-oriented environment.
- Prepared high-quality technical documentation and structured responses for internal review processes, demonstrating attention to detail and strong written communication.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Built and demoed enterprise **operations software** for multi-location teams, highlighting inventory visibility, workflow automation, and audit-ready reporting in customer-facing sessions.
- Led technical discussions on **enterprise architecture** including API-based integration strategies, data sync, and security considerations for SaaS deployments.

TechBridge Solutions **India**
Technical Solutions Intern *January 2023 – April 2023*
- Assisted sales and engineering teams with **RFP responses**, product demos, and discovery calls, developing deep functional knowledge of SaaS platforms and integration requirements.
- Participated in trade-show style presentations and webinar support, answering product and technical questions while learning story-based demo techniques from senior mentors.

Skills

Solutions Engineering: Discovery, technical presentations, tailored demos, RFP support, stakeholder communication
Technical: REST APIs, integration strategies, PostgreSQL, cloud basics (AWS/GCP), IT security fundamentals
Domain Exposure: Operations execution, inventory/workflow systems, LMS-style training modules, multi-site rollouts
Tools: Git, Jira, documentation, demo environments, cross-functional collaboration

Projects

OpsPulse | *React, Node.js, PostgreSQL, REST APIs*
- Built an **operations execution platform** prototype for multi-location teams with task audits, inventory tracking, and compliance dashboards — tailored for hospitality-style operational workflows.

FinNexus Live | *React, TypeScript, APIs, PostgreSQL*
- Developed demo-ready SaaS platform showcasing role-based workflows, reporting, and third-party integrations for business stakeholder evaluations.

Big-Brain Live | *React, Python, APIs, Documentation*
- Created AI-enabled productivity platform with clear user journeys and technical documentation, demonstrating ability to explain product value to mixed technical/non-technical audiences.
