Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer with 2+ years shipping product features across **Python, Go, and React** at scale. Experienced with **distributed systems**, **data pipelines**, and **AI/LLM** applications. High-slope builder with strong ownership mindset, bias toward action, and excitement for large-scale ads and recommendation systems.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4.0*
Coursework: Distributed Systems, Machine Learning, Analysis of Algorithms, Database Systems

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4.0*
Coursework: Data Structures, Software Engineering, Machine Learning, Computer Networks

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built and shipped product features across backend and frontend systems using **Python, Go, and React**, contributing to **distributed services** that are reliable, fast, and scalable.
- Integrated **AI/LLM capabilities** to improve product quality and user relevance, debugging and maintaining production systems with significant real-user impact.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed high-throughput backend services with **gRPC and Python**, operating in fast-moving startup environment with strong ownership and bias toward shipping.
- Collaborated with product and engineering partners to turn ambiguous requirements into working features, learning new codebases quickly through action.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*

- Built **ranking and optimization** pipelines for ML experiments, processing large datasets and improving model performance by 18% through data-driven iteration.
- Applied **LLM tooling** for experimentation workflows, analytics, and automated evaluation of model outputs at scale.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Shipped backend product features in **Python and Go** with **gRPC** microservices, supporting real-time data pipelines and growth-oriented platform capabilities.
- Maintained production systems serving thousands of daily users, improving reliability and performance through clean, maintainable code and observability.

ScaleAds Systems **India**
Software Engineer Intern *January 2023 – April 2023*

- Contributed to **ads delivery and measurement** tooling in **Python/Go**, building analytics pipelines for targeting, optimization, and advertiser reporting dashboards in **React**.
- Worked on experimentation and ranking prototypes, excited to learn how large-scale advertising systems improve relevance and business outcomes.

Skills

Languages: Python, Go, Rust basics, TypeScript, Java, SQL
Systems: Distributed systems, gRPC, data pipelines, backend services, React
AI & Product: LLMs, ranking/optimization, experimentation, analytics, growth systems
Practices: Git, CI/CD, debugging, ownership, fast shipping, cross-functional collaboration

Projects

AdRank Engine | *Python, Go, gRPC, Data Pipelines*

- Built **ads-style ranking and delivery prototype** processing high-volume event data, with targeting logic, measurement metrics, and optimization feedback loops.

Big-Brain Live | *Python, React, LLM APIs*

- Shipped AI-powered product using LLMs for relevance and content quality, demonstrating ability to integrate modern AI stack into user-facing experiences.

FinNexus Live | *React, Python, Analytics, Growth*

- Developed growth-oriented platform with analytics dashboards and backend APIs, serving 50K+ users with focus on measurable product outcomes.
