Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer pursuing an MSCS with 2+ years building cross-platform backend systems, deployment workflows, and database-backed applications, with hands-on debugging, documentation, and production support experience across distributed engineering environments.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered **cross-platform integration services** using Python, SQL, AWS Glue, and S3, improving response time by **30%** while supporting distributed APIs, data movement, troubleshooting, and reliable release coordination across Windows, Linux, and macOS.
- Maintained **20+ automated validation suites** with Jenkins, PyTest, and Mockito, increasing CI reliability by **68%** and reducing regressions while strengthening installation readiness, defect isolation, and documentation across recurring build and upgrade cycles.

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built **backend services and release workflows** for 500+ users, translating stakeholder requests into APIs, validation logic, schema updates, and maintainable deployment pipelines across cloud-hosted systems, internal tools, and production support handoffs.
- Improved **system performance and reliability** by tuning indexed queries, background jobs, and CI/CD releases, reducing dashboard latency from **1.2s to 350ms** while strengthening debugging, traceability, issue escalation, and handoffs for production environments.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed **Python services and file-ingestion workflows** handling 10,000+ daily requests, integrating uploads, OCR processing, persistence logic, and automated checks to improve validation coverage, production reliability, and support responsiveness under active usage.
- Debugged **runtime and workflow defects** across upload, OCR, persistence, and grading failures, documenting fixes and reducing feedback turnaround by **60%** while improving issue isolation, reproducibility, customer-facing support, and escalation readiness.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built **REST and WebSocket modules** over SQL/NoSQL persistence, supporting 2M+ synchronized records across integrations, dashboards, and operational workflows while strengthening high-volume reliability, service coordination, networking, and issue resolution for users.
- Automated **Docker-based build and test flows** with Jenkins, cutting release time by **50%** while improving deployment consistency, troubleshooting speed, validation coverage, and team handoffs during debugging, upgrades, and production-readiness checks.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built **Flask APIs and real-time messaging flows** using Firebase Cloud Messaging for 50K+ records, delivering responsive application behavior while supporting webhook integrations, token-based access control, and documented client-facing system workflows.
- Integrated **payment and notification workflows** with technical documentation and maintainable backend logic, reducing manual handling by **70%** while improving operational coordination, issue follow-through, and alignment across client and engineering teams.

Skills

Languages: Python, JavaScript, TypeScript, Java, SQL, Bash, C++
Systems: Windows/Linux/macOS support, networking fundamentals, databases, debugging, troubleshooting, technical documentation, release coordination
Tools: Jenkins, Docker, Git/GitHub, REST APIs, WebSockets, AWS Glue/S3, Azure SQL, PostgreSQL, MySQL, CI/CD, cloud-hosted environments

Projects

Chat2SQL Code | *Java, TypeScript, SQL, Docker, Maven*
- Built an **AI-powered SQL workspace** supporting 10+ databases, accelerating query authoring, schema exploration, and data management from a unified interface while strengthening cross-platform setup, database troubleshooting, and Docker-based local deployment workflows.

Linguistix Code | *Python, AWS, Docker, CI/CD*
- Developed and deployed a **containerized RESTful data-processing API** on AWS using CodePipeline and ECS/Fargate, with automated CI/CD releases and validation checks that improved reliability, reproducibility, and production support for integration workflows.

FinNexus Live | *Next.js, Kubernetes, WebSockets, MongoDB*
- Built a **secure fintech platform** supporting 50K+ users and 1M+ transactions, integrating real-time updates, tokenized access controls, CI/CD workflows, and operational visibility dashboards that improved system coordination and deployment confidence.
