Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Product-focused software engineer pursuing an MSCS with 2+ years building **Linux/Python data systems**, LLM workflows, React tooling, statistical evaluation pipelines, and performance-oriented software.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Operating Systems, Database Systems, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*

- Built **systems evaluation pipelines** across 100,000+ trajectory records, producing metrics, logs, reports, and reproducible artifacts for model behavior debugging, experiment comparison, outlier review, validation, and tuning.
- Integrated **HD-map geometry and trajectory context** with attention-based encoders, improving planning accuracy by **18%** while surfacing edge cases through statistical diagnostics, simulation reviews, validation, reporting, and tuning.

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built **data engineering workflows** for 500+ users, translating requirements into APIs, validation logic, monitored jobs, technical documentation, release notes, and maintainable delivery through reviewed changes and support.
- Improved **backend reliability and performance** by tuning indexed queries, background jobs, and CI/CD releases, reducing dashboard latency from **1.2s to 350ms** with diagnostic handoffs, reviews, and runbooks.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **React dashboards and Python services** handling 10,000+ daily requests, implementing file ingestion, REST endpoints, automated checks, LLM workflows, documented fixes, production delivery, reviews, and testing.
- Prototyped **LLM-assisted evaluation workflows** with OCR, model routing, cost tracking, and validation cases, reducing feedback turnaround by **60%** through iterative debugging, user testing, diagnostics, reviews, and iteration.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Engineered **cross-platform API and ETL services** using Python, SQL, AWS Glue, and S3, improving response time by **30%** across integrations, Linux validation, releases, documentation, supportability, and reviews.
- Maintained **20+ automated test suites** with Jenkins, PyTest, and Mockito across Windows, Linux, and macOS validation flows, increasing CI reliability by **68%** during deployments, reviews, and checks.

Pandit Deendayal Energy University **India**
Data Analyst - Research Fellowship *May 2023 – August 2023*

- Built a **statistical detection pipeline** over 650K+ URLs with 21 behavioral indicators, combining feature engineering, model evaluation, validation reports, outlier analysis, reproducible experiments, reviews, reporting, and audits.
- Achieved **96%+ detection accuracy** through systematic validation, feature comparison, and model diagnostics, documenting repeatable workflows for large-scale data review, statistical reporting, experiment handoffs, audits, reviews, and findings.

Skills

Languages: Python, C++, Java, JavaScript, TypeScript, SQL, Bash, HTML/CSS
Systems: Linux, Unix familiarity, Windows, operating systems, algorithms, data structures, performance analysis
Data/AI: data engineering, data science, statistical analysis, outlier detection, LLM workflows, PyTorch, Transformers
Frontend: React, Next.js, dashboards, reporting views, responsive interfaces, user-facing validation tools
Delivery: Git, Docker, Jenkins, CI/CD, PyTest, Mockito, REST APIs, PostgreSQL, MySQL, MongoDB, documentation

Projects

CPU Scheduling Simulator Live | *C++, React.js, JavaScript*

- Implemented **FCFS, SJF, SRT, RR, priority, and MLQ scheduling** with metric calculation and visualization, strengthening OS fundamentals, C++ runtime reasoning, debugging discipline, scheduler comparisons, and performance analysis.

CaptionCraft Live | *Transformers, PyTorch, Flask, Computer Vision*

- Benchmarked **transformer inference pipelines** across BLIP, GIT, and ViT-GPT-2 models on 10K images and 100K captions, improving caption accuracy by **15%** with diagnostics, validation, reporting, and testing.

Big-Brain Live | *FAISS, PostgreSQL, GCP, LLM APIs*

- Engineered an **LLM retrieval platform** indexing 50K+ documents with FAISS, PostgreSQL, and GCP deployment, reducing retrieval latency by **40%** through optimized ingestion, indexing, caching, and search workflows.
