Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer pursuing an MSCS with 2+ years building full-stack web applications, REST APIs, and database-backed systems using Java-adjacent, Python, and JavaScript/TypeScript stacks across collaborative Agile environments.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built **backend services and web workflows** for 500+ users, translating stakeholder requests into APIs, validation logic, schema updates, and maintainable release pipelines across cloud-hosted systems, internal tools, and production-facing applications.
- Improved **system performance and reliability** by tuning indexed queries, background jobs, and CI/CD releases, reducing dashboard latency from **1.2s to 350ms** while strengthening debugging, traceability, and production support across shared applications.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed **full-stack application workflows** handling 10,000+ daily requests, integrating uploads, OCR processing, persistence logic, and automated checks to improve usability, validation coverage, and backend reliability for instructor-facing web experiences.
- Debugged **runtime and workflow defects** across upload, OCR, persistence, and grading features, documenting fixes and reducing feedback turnaround by **60%** while improving code quality, issue resolution, and maintainability.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built **REST and WebSocket modules** over SQL/NoSQL persistence, supporting 2M+ synchronized records across integrations, dashboards, and operational workflows while strengthening user-facing responsiveness, service coordination, and high-volume application reliability.
- Automated **Docker-based build and test flows** with Jenkins, cutting release time by **50%** while improving deployment consistency, troubleshooting speed, validation coverage, and engineering handoffs during debugging and iterative feature delivery.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built **Flask APIs and real-time messaging flows** using Firebase Cloud Messaging for 50K+ records, delivering responsive application behavior while supporting webhook integrations, token-based access control, and documented client-facing workflows.
- Integrated **payment and notification features** with maintainable backend logic and technical documentation, reducing manual handling by **70%** while improving operational coordination, usability, and alignment across client and engineering teams.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered **cross-platform integration services** using Python, SQL, AWS Glue, and S3, improving response time by **30%** while supporting distributed APIs, data movement, automation workflows, and reliable release coordination across environments.
- Maintained **20+ automated validation suites** with Jenkins, PyTest, and Mockito, increasing CI reliability by **68%** and reducing regressions while strengthening code quality, defect isolation, and documentation across recurring build cycles.

Skills

Languages: Java, Python, JavaScript, TypeScript, SQL, C++, Bash
Frontend: React, Next.js, HTML/CSS, responsive UI, user-facing workflows
Backend: REST APIs, Flask, Node.js, WebSockets, server-side logic, integration workflows
Databases & Tools: MySQL, MongoDB, PostgreSQL, Docker, Jenkins, Git/GitHub, CI/CD, debugging, Agile collaboration

Projects

Chat2SQL Code | *Java, TypeScript, SQL, Docker, Maven*
- Built an **AI-powered SQL workspace** supporting 10+ databases, accelerating query authoring, schema exploration, and data management from a unified interface while working across Java backend and TypeScript frontend modules.

HMIS Live | *MERN, Twilio, Sentry, TypeScript*
- Built a **full-stack healthcare platform** with appointment workflows, consent-based patient-history access, Twilio notifications, and monitoring, reducing administrative workload by **30%** while improving user-facing coordination, responsiveness, and day-to-day operational clarity.

FinNexus Live | *Next.js, WebSockets, Kubernetes, MongoDB*
- Built a **secure financial web platform** supporting 50K+ users and 1M+ transactions, integrating real-time updates, tokenized access controls, and CI/CD workflows that improved system coordination and application reliability.
