Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer pursuing an MSCS with 2+ years building **AI-assisted products**, backend services, data platforms, React interfaces, Dockerized workflows, automated tests, and scalable production systems.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built **AI-assisted product workflows** for 500+ users, translating stakeholder requests into APIs, normalized schemas, monitored jobs, documentation, validation logic, and production releases across cloud storage systems reliably.
- Improved **backend platform performance** by simplifying indexed queries, background jobs, and CI/CD releases, reducing dashboard latency from **1.2s to 350ms** while supporting reliable user analytics workflows daily.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **AI-powered backend APIs and React tooling** handling 10,000+ daily requests, implementing file ingestion, concurrent processing, model workflows, automated checks, documented fixes, and sprint delivery ownership.
- Partnered with users to debug **production workflow defects** by reproducing OCR, persistence, and execution failures, documenting regression cases, reviewing fixes, and cutting feedback turnaround by **60%** safely.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*

- Built **evaluation pipelines** across 100,000+ records, producing structured metrics, logs, and visual summaries for AI/ML benchmarking, reproducible experiments, model-analysis workflows, diagnostics, reporting, reviews, summaries, and analysis.
- Documented **prompt, evaluation, and reporting workflows** for researchers, turning ad hoc experiments into repeatable processes with clearer technical handoffs, validation outputs, team-facing analysis notes, summaries, and reviews.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Engineered **cross-platform API and ETL services** using Python, SQL, AWS Glue, and S3, improving response time by **30%** across integrations, release reviews, operational handoffs, and data workflows.
- Maintained **20+ automated test suites** with Jenkins, PyTest, and Mockito across validation flows, increasing CI reliability by **68%** while reducing release regressions during distributed deployments and checks.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **modular product services** with REST APIs, WebSockets, and SQL/NoSQL persistence, supporting 2M+ synchronized records across dashboards, integrations, monitoring, debugging, validation, and release workflows for users daily.
- Automated **Docker-based build and test flows** with Jenkins, cutting release time by **50%** while improving deployment consistency, troubleshooting documentation, and shared-environment handoffs for engineers, reviewers, and releases.

Skills

Languages: Python, Java, TypeScript, JavaScript, SQL, C++, Bash, HTML/CSS
Backend: REST APIs, OOP, microservices, service design, validation, workflow orchestration, gRPC concepts, documentation
Data: PostgreSQL, MySQL, SQL Server, MongoDB, ETL, indexing, query tuning, data pipelines, analytics logs
Cloud/DevOps: AWS Glue/S3, GCP, Docker, Jenkins, CI/CD, Git, GitHub, Kubernetes concepts, Agile, production support
AI/Product: AI-assisted coding, LLM workflows, prompt evaluation, React, Next.js, product ownership, simplification, debugging

Projects

Big-Brain Live | *LLaMA-2, FAISS, Pinecone, PostgreSQL, GCP*

- Built a **semantic document platform** over 50K+ documents using transformer embeddings and FAISS, enabling contextual Q&A, summarization, access controls, and sub-second retrieval through optimized ingestion pipelines.

PiXMod Live | *Next.js, MongoDB, Stripe, Transformers*

- Built an **AI-powered SaaS image platform** using SAM, Stable Diffusion, CLIP, Stripe billing, MongoDB metadata, and responsive Next.js flows to support search, editing, subscriptions, monetization, and upgrades.

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB, Plaid*

- Built a **secure fintech platform** supporting 50K+ users and 1M+ transactions with Plaid integrations, token-based access, real-time updates, Kubernetes deployment, CI/CD releases, analytics, monitoring, alerts, and reporting.
