Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Associate software developer pursuing an MSCS with 2+ years building **secure web applications**, APIs, tests, CI/CD workflows, and database-backed services for reliable client-facing digital products.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built **secure platform workflows** for 500+ users, translating requirements into APIs, validation logic, monitored jobs, technical documentation, release notes, and maintainable delivery through reviewed changes and support runbooks.
- Improved **application reliability and database performance** by tuning indexed queries, background jobs, and CI/CD releases, reducing dashboard latency from **1.2s to 350ms** with traceable production handoffs and reviews.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **React interfaces and Flask APIs** handling 10,000+ daily requests, implementing file ingestion, authentication-aware flows, automated checks, documented fixes, and sprint-ready production workflows with code review.
- Supported **testing and debugging workflows** by reproducing OCR, persistence, and execution defects, documenting regression cases, reviewing fixes, and cutting instructor feedback turnaround by **60%** across validation cycles.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*

- Created **Python evaluation pipelines** across 100,000+ records, producing reproducible metrics, logs, reports, and review artifacts for debugging model behavior and validating decision workflows under experiment constraints.
- Documented **edge cases and system behavior** for researchers, turning ad hoc experiments into repeatable test scenarios with traceable outputs, clearer handoffs, and reviewable conclusions for implementation planning.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Engineered **API and ETL services** using Python, SQL, AWS Glue, and S3, improving response time by **30%** across integrations, releases, reviews, and handoffs for distributed advisor-style users.
- Maintained **20+ automated test suites** using Jenkins, PyTest, and Mockito across validation flows, increasing CI reliability by **68%** and reducing release regressions during coordinated deployments and reviews.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **full-stack application modules** with REST APIs, WebSockets, and SQL/NoSQL persistence, supporting 2M+ synchronized records across dashboards, workflows, integrations, code reviews, releases, support needs, and runtime logs.
- Automated **Docker-based build and test flows** with Jenkins, cutting release time by **50%** while improving deployment consistency, troubleshooting documentation, and shared-environment handoffs across staging workflows and releases.

Skills

Languages: Java, C# familiarity, JavaScript, TypeScript, Python, SQL, C++, Bash
Frontend: React, Angular familiarity, Next.js, HTML/CSS, responsive dashboards, web-enabled applications
Backend: REST APIs, Flask, FastAPI, Node.js, .NET familiarity, service design, authentication, validation
Data: PostgreSQL, MySQL, SQL Server, MongoDB, relational design, NoSQL, query tuning, data integrity
Delivery: Agile/Scrum, sprint planning, standups, retrospectives, Git, CI/CD, Jenkins, Docker, testing, debugging

Projects

FinNexus Live | *Next.js, TypeScript, MongoDB, Plaid, WebSockets*

- Built a **secure fintech dashboard** supporting 50K+ users and 1M+ transactions with Plaid bank linking, token-based access, real-time updates, CI/CD-backed deployments, monitoring, advisor-review workflows, and audit logs.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*

- Built an **AI-powered SQL workspace** supporting 10+ databases, accelerating query authoring, schema exploration, and database management through Java services and TypeScript interfaces with Docker workflows and Git collaboration.

HMIS Live | *MERN, TypeScript, ABDM APIs, Sentry*

- Implemented **consent-based healthcare workflows** with patient history access, appointment scheduling, Twilio alerts, Sentry monitoring, and scalable TypeScript APIs, reducing administrative workload by **30%** through secure validation checks.
