Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Forward-deployed software engineer pursuing an MSCS with 2+ years building AI workflows, customer-facing systems, data integrations, and production automation across Python, TypeScript, cloud, and LLM-backed products.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Built **AI document workflows** handling 10,000+ daily requests, combining OCR, file ingestion, LLM prompts, and REST APIs to convert unstructured submissions into reliable structured outputs for users.
- Partnered with users to debug **workflow and execution defects** across upload, persistence, OCR, and grading failures, documenting fixes and reducing feedback turnaround by **60%** during launches.

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built **customer-facing platform services** for 500+ users, translating stakeholder requests into API changes, database updates, validation logic, and reusable documentation for production releases across implementation teams during deployments.
- Improved **data-backed workflow performance** by tuning indexed queries, background jobs, and CI/CD releases, reducing dashboard latency from **1.2s to 350ms** while supporting customer handoffs and demos reliably.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Engineered **cross-platform integration services** using Python, SQL, AWS Glue, and S3, improving response time by **30%** while supporting distributed customer data workflows and operational reporting needs.
- Maintained **20+ automated validation suites** with Jenkins, PyTest, and Mockito, increasing CI reliability by **68%** and reducing release regressions across shared environments and deployments for teams.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*

- Built **ML evaluation pipelines** across 100,000+ records, producing structured metrics, logs, and reports for reproducible experiments, anomaly reviews, and model behavior analysis at scale for researchers.
- Documented **prompt, evaluation, and reporting workflows** for researchers, turning ad hoc experiments into repeatable processes with clearer technical handoffs and validation outputs for technical teams and reviews.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **REST and WebSocket services** with SQL/NoSQL persistence, supporting 2M+ synchronized records across dashboards, integrations, and operational workflows for high-volume users and customers reliably across teams daily.
- Automated **Docker-based build and test flows** with Jenkins, cutting release time by **50%** while improving deployment consistency, troubleshooting, and team documentation for smooth weekly implementation handoffs.

Skills

Languages: **Python**, **TypeScript**, JavaScript, SQL, Java, C++, Bash, HTML/CSS
AI/Automation: LLM prompts, OCR workflows, model evaluation, data extraction, AI-assisted coding
Backend: REST APIs, Flask, FastAPI, Node.js, WebSockets, workflow orchestration, integrations
Data/Cloud: PostgreSQL, MySQL, MongoDB, Azure SQL, AWS Glue, S3, ETL, structured outputs
Delivery: Docker, Jenkins, GitHub, CI/CD, Agile/Scrum, technical documentation, customer debugging

Projects

Chat2SQL Code | *Java, TypeScript, SQL, Docker*

- Built an **AI-powered SQL workspace** supporting 10+ databases, accelerating query authoring, schema exploration, and database-management workflows through Java services and TypeScript interfaces for implementation teams and analysts.

Linguistix Code | *Python, AWS, Docker, CI/CD*

- Developed a **containerized REST processing API** with AWS deployment, CI/CD releases, validation checks, and reproducible execution, achieving **87%** classification accuracy with diagnostic reporting and workflow automation.

HMIS Live | *MERN, ABDM APIs, Sentry, Twilio*

- Implemented **secure operational workflows** integrating patient, provider, claims, notifications, and monitoring features with consent-based APIs, structured validation, and alert-driven reliability across service boundaries and dashboards for review.
