Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer pursuing an MSCS with 2+ years building production APIs, cloud-backed automation, CI/CD validation, monitoring-ready workflows, and reliable systems for data-heavy, regulated, customer-facing operations.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built **Azure SQL-backed platform services** for 500+ users, translating operational requirements into APIs, schema updates, validation logic, and release workflows with reliable handoffs across production systems and stakeholders.
- Improved **production performance and triage readiness** by tuning indexed queries, background jobs, and CI/CD releases, reducing dashboard latency from **1.2s to 350ms** with documented rollback notes and ownership.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered **cross-platform integration services** using Python, SQL, AWS Glue, and S3, improving response time by **30%** while supporting operational handoffs, monitoring reports, and scheduled data workflows.
- Maintained **20+ automated validation suites** with Jenkins, PyTest, and Mockito, increasing CI reliability by **68%** and reducing release regressions across Windows, Linux, and macOS environments consistently.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built **REST and WebSocket modules** over SQL/NoSQL persistence, supporting 2M+ synchronized records while improving throughput consistency, session reliability, and troubleshooting visibility across dashboard workflows and integrations safely.
- Automated **Docker-based build and test flows** with Jenkins, cutting release time by **50%** while improving deployment consistency, validation checks, support documentation, and shared-environment readiness for teams.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed **Python and JavaScript services** handling 10,000+ daily requests, implementing file ingestion, REST APIs, persistence workflows, and automated checks under reliable weekly Agile sprint delivery cadences and reviews.
- Supported **production debugging and user workflows** by reproducing OCR, upload, persistence, and processing failures, documenting fixes, and reducing feedback turnaround by **60%** for instructors during releases.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*
- Built **evaluation pipelines** across 100,000+ records, producing structured metrics, logs, and reports that supported reproducible analysis, anomaly investigation, and reliable model validation workflows daily for reviewers.
- Documented **experiment workflows and technical findings** for researchers, turning ad hoc debugging sessions into repeatable analysis procedures with clearer handoffs, review notes, and validation outputs for teams.

Skills

Languages: **Python**, JavaScript, TypeScript, SQL, Java, C++, Bash, HTML/CSS
Cloud/Ops: Azure SQL, AWS Glue, S3, Docker, Jenkins, GitHub, CI/CD, release support
Reliability: Production debugging, incident triage, logs, validation checks, monitoring concepts, rollback notes
Systems: Windows/Linux fundamentals, REST APIs, WebSockets, databases, ETL workflows, app architecture
Delivery: Agile/Scrum, code reviews, technical documentation, issue tracking, compliance-aware workflows

Projects

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB, Plaid*
- Built a **secure fintech dashboard** supporting 50K+ users and 1M+ transactions, integrating Plaid, real-time updates, tokenized access controls, and CI/CD-backed deployment workflows for safer daily financial operations.

Linguistix Code | *Python, AWS, Docker, CI/CD*
- Developed a **containerized REST processing API** with AWS deployment, CI/CD releases, validation checks, and reproducible execution, achieving **87%** classification accuracy with diagnostic reporting and operational logs.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*
- Built an **AI-powered SQL workspace** supporting 10+ databases, accelerating query authoring, schema exploration, and database-management workflows through Java services and TypeScript interfaces during reliable daily developer workflows.
