Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack developer pursuing an MSCS with 2+ years building **React/Python applications**, internal dashboards, APIs, automations, and AI-enabled workflows for business operations and stakeholder-facing platforms.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built **internal platform workflows** for 500+ users, translating stakeholder requests into APIs, validation logic, monitored jobs, technical documentation, release notes, and maintainable delivery through reviewed changes and support runbooks.
- Improved **dashboard reliability and database performance** by tuning indexed queries, background jobs, and CI/CD releases, reducing latency from **1.2s to 350ms** with traceable production handoffs and reviews.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **React dashboards and Flask APIs** handling 10,000+ daily requests, implementing file ingestion, automated checks, AI-assisted workflows, documented fixes, and sprint-ready production delivery with stakeholder feedback.
- Partnered with stakeholders to **debug business-critical workflows** by reproducing OCR, persistence, and execution defects, documenting regression cases, reviewing fixes, and cutting feedback turnaround by **60%** across validation cycles.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*

- Created **Python evaluation pipelines** across 100,000+ records, producing reproducible metrics, logs, reports, and review artifacts for AI behavior analysis and operational decision workflows under experiment constraints.
- Documented **edge cases and system behavior** for researchers, turning ad hoc experiments into repeatable test scenarios with traceable outputs, clearer handoffs, and reviewable conclusions for implementation planning.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Engineered **API and ETL services** using Python, SQL, AWS Glue, and S3, improving response time by **30%** across integrations, releases, reviews, and handoffs for distributed business users.
- Maintained **20+ automated test suites** using Jenkins, PyTest, and Mockito across validation flows, increasing CI reliability by **68%** and reducing release regressions during deployments, reviews, and release checks.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **business application modules** with REST APIs, WebSockets, and SQL/NoSQL persistence, supporting 2M+ synchronized records across dashboards, workflows, integrations, reviews, releases, support needs, runtime logs, and debugging.
- Automated **Docker-based build and test flows** with Jenkins, cutting release time by **50%** while improving deployment consistency, troubleshooting documentation, and shared-environment handoffs across staging workflows and releases.

Skills

Languages: Python, JavaScript, TypeScript, SQL, Java, C++, Bash, HTML/CSS
Frontend: React, Next.js, responsive dashboards, UI workflows, rapid prototyping, stakeholder-facing tools
Backend: Flask, FastAPI, Node.js, REST APIs, integrations, validation, authentication, service design
Platforms: Azure SQL, Microsoft Azure familiarity, Salesforce API concepts, AWS, Docker, GitHub, CI/CD
Data/AI: PostgreSQL, MySQL, MongoDB, SQL Server, AI-assisted coding, LLM workflows, testing, monitoring

Projects

FinNexus Live | *Next.js, TypeScript, MongoDB, Plaid, WebSockets*

- Built a **secure operational dashboard** supporting 50K+ users and 1M+ transactions with Plaid integrations, token-based access, real-time updates, CI/CD deployments, monitoring, audit workflows, business reporting, and metrics.

HMIS Live | *MERN, TypeScript, ABDM APIs, Sentry*

- Implemented **business workflow automation** with patient-history access, appointment scheduling, Twilio alerts, Sentry monitoring, and scalable TypeScript APIs, reducing administrative workload by **30%** through validation checks and dashboards.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*

- Built an **AI-powered SQL workspace** supporting 10+ databases, accelerating query authoring, schema exploration, and database management through Java services and TypeScript interfaces with Docker workflows and Git collaboration.
