Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer pursuing an MSCS with 2+ years building backend services, REST APIs, full-stack workflows, and cloud-hosted systems using Python, Flask, SQL, JavaScript/TypeScript, Git-based delivery, and production testing practices.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built **backend services and data workflows** for 500+ users, translating stakeholder requests into APIs, validation logic, schema updates, and maintainable release pipelines across cloud-hosted systems and internal operations.
- Improved **system performance and reliability** by tuning indexed queries, background jobs, and CI/CD releases, reducing dashboard latency from **1.2s to 350ms** while strengthening debugging, traceability, and production support.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed **Flask backend services and product workflows** handling 10,000+ daily requests, integrating uploads, OCR processing, persistence logic, and model-backed evaluation pipelines for instructor-facing applications and internal tools.
- Debugged **runtime issues and release blockers** across upload, OCR, persistence, and grading features, reducing feedback turnaround by **60%** while improving testing confidence, delivery speed, and maintainability overall.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered **cross-platform APIs and ETL services** using Python, SQL, AWS Glue, and S3, improving response time by **30%** while supporting reliable integrations, transformation workflows, and release coordination.
- Maintained **20+ automated validation suites** with Jenkins, PyTest, and Mockito, increasing CI reliability by **68%** while strengthening defect isolation, repeatable testing, and Git-based delivery across production systems.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built **REST APIs, WebSockets, and responsive interfaces** over SQL/NoSQL persistence, supporting 2M+ synchronized records across operational workflows while improving service coordination, reliability, and user-facing responsiveness at scale.
- Automated **Docker-based build and test flows** with Jenkins, cutting release time by **50%** while improving deployment consistency, troubleshooting speed, validation coverage, and engineering handoffs during iterative delivery.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built **Flask APIs and web workflows** using Firebase Cloud Messaging for 50K+ records, delivering responsive application behavior while supporting notifications, webhook integrations, and documented client-facing release processes.
- Integrated **payment and notification features** with maintainable backend logic and technical documentation, reducing manual handling by **70%** while improving usability, coordination, and support across product releases consistently.

Skills

Languages: Python, JavaScript, TypeScript, SQL, Java, C++, Bash
Backend: Flask, Django familiarity, REST APIs, WebSockets, server-side logic, data validation, internal tools
Frontend: React, Next.js, responsive UI, accessibility basics, UI/UX awareness, full-stack product workflows
Platforms & Tools: PostgreSQL, MySQL, MongoDB, AWS Glue, S3, Docker, Jenkins, Git/GitHub, CI/CD, unit testing, integration testing, Agile

Projects

HMIS Live | *MERN, Twilio, Sentry, TypeScript, ABDM APIs*
- Built a **full-stack healthcare platform** with appointment workflows, consent-based access, notifications, and monitoring, reducing administrative workload by **30%** while improving internal coordination and operational visibility across teams.

PiXMod Live | *Next.js, Stripe, MongoDB, SAM, Stable Diffusion*
- Built an **AI-powered full-stack SaaS platform** for segmentation, restoration, semantic search, and subscription billing, processing 1K+ edited assets while improving premium conversion by **18%** through polished workflows.

Chat2SQL Code | *Java, TypeScript, SQL, Docker, Maven*
- Built an **AI-powered SQL workspace** supporting 10+ databases, accelerating query authoring, schema exploration, and data management from a unified interface across Java backend and TypeScript frontend modules.
