Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack software engineer pursuing an MSCS with 2+ years building **React/Next.js-style interfaces**, REST APIs, SQL-backed workflows, reporting dashboards, documentation, and CI/CD-backed products.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built **platform workflows** for 500+ users, translating stakeholder requests into APIs, validation logic, monitored jobs, technical documentation, release notes, and maintainable self-serve delivery through reviewed changes and RFCs.
- Improved **SQL-backed reporting reliability** by tuning indexed queries, background jobs, and CI/CD releases, reducing dashboard latency from **1.2s to 350ms** with traceable handoffs, support runbooks, and reviews.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **React dashboards and Flask APIs** handling 10,000+ daily requests, implementing file ingestion, automated checks, user feedback loops, documented fixes, and sprint-ready product delivery for stakeholders.
- Partnered with users to debug **business-critical workflows** by reproducing OCR, persistence, and execution defects, documenting regression cases, reviewing fixes, and cutting feedback turnaround by **60%** reliably weekly.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Engineered **Python API and ETL services** using SQL, AWS Glue, and S3, improving response time by **30%** across integrations, release reviews, operational handoffs, troubleshooting, documentation, and supportability.
- Maintained **20+ automated test suites** with Jenkins, PyTest, and Mockito across validation flows, increasing CI reliability by **68%** while reducing release regressions during deployments, reviews, and checks.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **CRM-style product modules** with REST APIs, WebSockets, and SQL/NoSQL persistence, supporting 2M+ synchronized records across dashboards, workflows, integrations, reviews, releases, debugging, validation, monitoring, support, and maintenance.
- Automated **Docker-based build and test flows** with Jenkins, cutting release time by **50%** while improving deployment consistency, troubleshooting documentation, validation notes, and shared-environment handoffs across staging workflows.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Built **service-booking and payment workflows** across web and mobile experiences, implementing wallet authentication, real-time synchronization, analytics views, and user-facing record management for operational teams and support needs.
- Delivered **full-stack workflow improvements** by connecting APIs, persistence layers, and interface states, improving booking visibility, transaction tracking, support handoffs, release readiness, reporting, and reviews for client-facing operations.

Skills

Languages:	TypeScript, JavaScript, Python, SQL, Java, C++, Bash, HTML/CSS
Frontend:	React, Next.js, dashboards, responsive UI, CRM-style workflows, reporting views, design-minded interfaces
Backend:	Node.js, NestJS familiarity, Flask, FastAPI, REST APIs, Prisma concepts, business logic, documentation
Data/Infra:	PostgreSQL, MySQL, MongoDB, AWS, Terraform exposure, Docker, CI/CD, Jenkins, GitHub Actions
Product:	RFC-style documentation, user feedback, workflow modeling, AI-assisted coding, testing, debugging, stakeholder handoffs

Projects

FinNexus Live | *Next.js, TypeScript, MongoDB, Plaid*

- Built a **financial reporting dashboard** supporting 50K+ users and 1M+ transactions with Plaid integrations, token-based access, real-time updates, CI/CD deployments, monitoring, analytics, metrics workflows, alerts, and audits.

HMIS Live | *MERN, TypeScript, ABDM APIs, Sentry*

- Implemented **workflow automation** with patient-history access, appointment scheduling, Twilio alerts, Sentry monitoring, and scalable TypeScript APIs, reducing administrative workload by **30%** through validation checks, dashboards, and alerts.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*

- Built an **AI-powered SQL workspace** supporting 10+ databases, accelerating query authoring, schema exploration, and database management through Java services, TypeScript interfaces, Docker workflows, Git collaboration, and testing.
