Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Mobile-minded software engineer pursuing an MSCS with 2+ years building **Android-adjacent product workflows**, React/TypeScript interfaces, Python APIs, SQL-backed systems, AI workflows, and fintech dashboards.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Built **cross-platform mobile booking workflows** across Android, iOS, and web experiences, implementing wallet authentication, real-time synchronization, analytics views, and user-facing record management for operations teams and releases.
- Integrated **payment and reservation APIs** with Firebase-backed state updates, improving booking visibility, transaction tracking, support handoffs, release readiness, and mobile workflow reliability across client-facing operations and testing.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **React dashboards and Python services** handling 10,000+ daily requests, implementing file ingestion, REST endpoints, automated checks, AI-assisted workflows, documented fixes, product feedback loops, and reviews.
- Partnered with users to debug **workflow defects** by reproducing OCR, persistence, and execution failures, documenting regression cases, reviewing fixes, and cutting feedback turnaround by **60%** across releases.

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built **product platform workflows** for 500+ users, translating stakeholder requests into APIs, validation logic, monitored jobs, technical documentation, release notes, and self-serve delivery through reviewed changes and support.
- Improved **SQL-backed service reliability** by tuning indexed queries, background jobs, and CI/CD releases, reducing dashboard latency from **1.2s to 350ms** with traceable handoffs, runbooks, reviews, and support.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **real-time product modules** with REST APIs, WebSockets, and SQL/NoSQL persistence, supporting 2M+ synchronized records across dashboards, workflows, integrations, releases, debugging, validation, monitoring, support, reliability, and maintenance.
- Automated **Docker-based build and test flows** with Jenkins, cutting release time by **50%** while improving deployment consistency, troubleshooting documentation, validation notes, and shared-environment handoffs across staging workflows.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Engineered **Python API and ETL services** using SQL, AWS Glue, and S3, improving response time by **30%** across integrations, release reviews, operational handoffs, troubleshooting, documentation, and supportability.
- Maintained **20+ automated test suites** with Jenkins, PyTest, and Mockito across validation flows, increasing CI reliability by **68%** while reducing release regressions during deployments, reviews, and checks.

Skills

Mobile:	Android concepts, Kotlin/Compose learning, MVVM awareness, React Native exposure, Firebase, mobile workflows
Frontend:	React, TypeScript, JavaScript, Next.js, dashboards, responsive UI, product interfaces, design collaboration
Backend:	Python, Flask, FastAPI, REST APIs, OpenAPI concepts, SQL, PostgreSQL, MySQL, MongoDB
Fintech:	payments, wallet authentication, transaction tracking, Plaid integrations, secure dashboards, real-time updates
Delivery:	Git, Docker, Jenkins, CI/CD, PyTest, Mockito, code reviews, debugging, documentation, AI-assisted coding

Projects

FinNexus Live | *Next.js, TypeScript, MongoDB, Plaid*

- Built a **fintech dashboard** supporting 50K+ users and 1M+ transactions with Plaid integrations, token-based access, real-time updates, monitoring, CI/CD deployments, analytics, alerts, audits, reporting, reviews, and metrics.

HMIS Live | *MERN, TypeScript, ABDM APIs, Sentry*

- Implemented **workflow automation** with patient-history access, appointment scheduling, Twilio alerts, Sentry monitoring, and scalable TypeScript APIs, reducing administrative workload by **30%** through validation checks, dashboards, and alerts.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*

- Built an **AI-powered SQL workspace** supporting 10+ databases, accelerating query authoring, schema exploration, and database management through Java services, TypeScript interfaces, Docker workflows, Git collaboration, and testing.
