Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer pursuing an MSCS with 2+ years building **mobile-ready web products**, TypeScript interfaces, REST APIs, SQL systems, cloud releases, automated tests, and production troubleshooting workflows.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **React and backend APIs** handling 10,000+ daily requests, implementing file ingestion, concurrent processing, AI-assisted workflows, automated checks, documented fixes, sprint delivery ownership, triage, and reviews.
- Partnered with users to debug **production workflow defects** by reproducing OCR, persistence, and execution failures, documenting regression cases, reviewing fixes, and cutting feedback turnaround by **60%** safely.

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built **SQL-backed product workflows** for 500+ users, translating stakeholder requests into APIs, normalized schemas, monitored jobs, documentation, validation logic, and production releases across cloud storage systems reliably.
- Improved **user-facing platform performance** by tuning indexed queries, background jobs, and CI/CD releases, reducing dashboard latency from **1.2s to 350ms** while supporting reliable analytics workflows daily safely.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Engineered **cross-platform API and ETL services** using Python, SQL, AWS Glue, and S3, improving response time by **30%** across integrations, release reviews, operational handoffs, workflows, and fixes.
- Maintained **20+ automated test suites** with Jenkins, PyTest, and Mockito across validation flows, increasing CI reliability by **68%** while reducing release regressions during distributed deployments and checks.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **modular web services** with REST APIs, WebSockets, and SQL/NoSQL persistence, supporting 2M+ synchronized records across dashboards, integrations, monitoring, debugging, validation, and release workflows for users daily.
- Automated **Docker-based build and test flows** with Jenkins, cutting release time by **50%** while improving deployment consistency, troubleshooting documentation, and shared-environment handoffs for engineers, reviewers, and releases.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Built **mobile-responsive booking and payment workflows** across web experiences, implementing wallet authentication, real-time synchronization, analytics views, and user-facing record management for operations teams, support, reporting, and dashboards.
- Delivered **full-stack workflow improvements** by connecting APIs, persistence layers, and interface states, improving booking visibility, transaction tracking, support handoffs, release readiness, operational reporting, documentation, triage, and monitoring.

Skills

Languages: TypeScript, JavaScript, Java, Python, SQL, C++, Bash, HTML/CSS
Frontend: React, Next.js, React Native/Expo readiness, Vue familiarity, responsive UI, component workflows
Backend: Spring Boot familiarity, REST APIs, OOP, service design, validation, monitoring, troubleshooting
Data/Cloud: PostgreSQL, MySQL, SQL Server, MongoDB, AWS Glue/S3, Docker, CI/CD, Jenkins, Git, GitHub
Quality/IoT: Unit tests, integration tests, PyTest, Mockito, Jira-style Agile, security basics, IoT/sensor-data interest

Projects

HMIS Live | *MERN, TypeScript, ABDM APIs, Sentry*

- Built **alert-driven healthcare workflows** integrating patient, provider, claims, notifications, and monitoring features with secure APIs, structured validation, Sentry observability, dashboards, operational support, triage, alerts, analytics, and reports.

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB, Plaid*

- Built a **secure workflow platform** supporting 50K+ users and 1M+ transactions with Plaid integrations, token-based access, real-time updates, Kubernetes deployment, CI/CD releases, analytics, monitoring, alerts, and reporting.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*

- Built an **AI-powered SQL workspace** supporting 10+ databases, accelerating query authoring, schema exploration, and database management through Java services, TypeScript interfaces, Docker workflows, validation, reviews, and tests.
