Sahaj Bhadja

(213) 284-4651 | bhadja@usc.edu | sahaj-bhadja | sahajbhadja | sahaj-bhadja

Summary

Software engineer pursuing an MSCS with 2+ years building **Java-adjacent backend services**, APIs, relational database workflows, AI-assisted tools, automated tests, and finance/product platforms.

Education

University of Southern California, Los Angeles, CA — **August 2024 – May 2026**
Master of Science in Computer Science — *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Operating Systems, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India — **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering — *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife — **Los Angeles, CA**
Software Engineer — *September 2025 – Present*

- Built **database-backed service workflows** for 500+ users, translating requirements into APIs, validation logic, monitored jobs, technical documentation, release notes, and maintainable delivery through reviewed changes for stakeholders.
- Improved **relational database performance** by tuning indexed queries, background jobs, and CI/CD releases, reducing dashboard latency from **1.2s to 350ms** with traceable handoffs, runbooks, and rollback notes.

Aasma Technology Solutions — **India**
Software Developer Engineer - (SecureSync) — *August 2023 – July 2024*

- Engineered **API and ETL services** using Python, SQL, AWS Glue, and S3, improving response time by **30%** across integrations, release reviews, operational handoffs, and documentation for partner systems.
- Maintained **20+ automated test suites** with Jenkins, PyTest, and Mockito across validation flows, increasing CI reliability by **68%** while reducing release regressions during deployments, checks, and approvals.

Aasma Technology Solutions — **India**
Full Stack Developer Intern - (VibrantChem) — *May 2023 – August 2023*

- Built **modular business services** with REST APIs, WebSockets, and SQL/NoSQL persistence, supporting 2M+ synchronized records across dashboards, workflows, integrations, releases, debugging, validation, and monitoring for internal teams.
- Automated **Docker-based build and test flows** with Jenkins, cutting release time by **50%** while improving deployment consistency, troubleshooting documentation, and shared-environment handoffs across staging workflows and release audits.

Grad8 — **Los Angeles, CA**
Software Engineer Intern — *June 2025 – August 2025*

- Developed **backend APIs and React tooling** handling 10,000+ daily requests, implementing file ingestion, automated checks, AI-assisted workflows, documented fixes, and sprint-ready product delivery for product reviewers.
- Partnered with users to debug **workflow defects** by reproducing OCR, persistence, and execution failures, documenting regression cases, reviewing fixes, and cutting feedback turnaround by **60%** for support owners.

LST Capitals — **India**
Web Developer Intern — *November 2022 – January 2023*

- Built **finance-adjacent booking and payment workflows** across web and mobile experiences, implementing wallet authentication, real-time synchronization, analytics views, and user-facing record management for operations teams and advisor reporting.
- Delivered **full-stack workflow improvements** by connecting APIs, persistence layers, and interface states, improving booking visibility, transaction tracking, support handoffs, release readiness, and operational reporting for stakeholder reviews.

Skills

Languages: Java, Python, TypeScript, JavaScript, SQL, C++, Bash, HTML/CSS
Backend: Spring Boot familiarity, REST APIs, OOP, service design, validation, reusable components, documentation
Databases: PostgreSQL, MySQL, SQL Server, MongoDB, relational design, schema modeling, indexing, query tuning
Delivery: Git, GitHub, Docker, Jenkins, CI/CD, PyTest, Mockito, code reviews, Agile, production support
AI/Finance: AI-assisted coding, LLM APIs, workflow orchestration exposure, portfolio/wealthtech interest, payments, reporting

Projects

Chat2SQL Code | *Java, TypeScript, SQL, Docker*

- Built an **AI-powered SQL workspace** supporting 10+ databases, accelerating query authoring, schema exploration, and database management through Java services, TypeScript interfaces, Docker workflows, Git collaboration, and reviews.

FinNexus Live | *Next.js, TypeScript, MongoDB, Plaid*

- Built a **secure finance dashboard** supporting 50K+ users and 1M+ transactions with Plaid integrations, token-based access, real-time updates, monitoring, CI/CD deployments, analytics, and alerts for reporting teams.

Linguistix Code | *Python, AWS, Docker, CI/CD*

- Developed a **containerized Python REST API** with AWS deployment, CI/CD releases, validation checks, and reproducible execution, achieving **87%** classification accuracy with diagnostic reporting and automated tests for reviewers.
