Sahaj Bhadja

(213) 284-4651 sahaj.bhadja@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Backend engineer experienced in **service APIs, distributed systems, contract-driven integrations, automated testing, CI/CD, and production troubleshooting**, combining Go project work with production Python, SQL, and cloud delivery.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Distributed Systems, Computer Networks, Database Systems, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Data Structures, Operating Systems

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Architected a multi-tenant platform with **REST APIs, normalized schemas, row-level isolation, and indexed service queries**, reducing dashboard latency from 1.2 seconds to 350 milliseconds for 500+ daily users.
- Reworked asynchronous FastAPI orchestration with **explicit job states, concurrent workers, failure isolation, logging, and production debugging**, tripling throughput for 1K+ jobs while maintaining 99%+ reliability across service releases.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Delivered Flask service endpoints and React integrations for uploads, workflows, history, and feedback, supporting 10K+ daily requests through **well-defined API contracts, validation, testing, and iterative feature delivery**.
- Developed multithreaded Python ingestion with MySQL and AWS RDS, reducing turnaround 60% through **secure validation, fault-tolerant processing, integration tests, production investigation, and repeatable CI/CD-backed production deployments and releases**.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer - (SecureSync) *India*

- Designed object-oriented services and distributed data integrations across Python, AWS Glue, S3, and SQL, improving response times 30% through **modular endpoints, reusable interfaces, asynchronous processing, and query optimization**.
- Automated 20+ unit and integration suites with PyTest, Mockito, Jenkins, and virtual machines, increasing pipeline efficiency 68% through **repeatable builds, API regression coverage, code reviews, and release validation**.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern - (VibrantChem) *India*

- Built eight modular services for secure authentication, billing, permissions, resources, and notifications, synchronizing 2M+ records through **REST APIs, WebSockets, event-driven updates, shared schemas, and reliable cross-service communication**.
- Developed React and TypeScript consumers for operational records and real-time updates while automating Docker and Jenkins delivery, reducing deployment time 50% through **integration testing, monitoring, and reusable client contracts**.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Built Flask APIs for bookings, pricing, coupons, payments, and real-time status updates across 50K+ records, achieving sub-200-millisecond responses through **data modeling, webhook processing, caching, and service optimization**.
- Translated customer requirements into technical specifications for 12+ integrations, defining **API contracts, validation rules, error behavior, data ownership, acceptance criteria, and implementation milestones** before development and stakeholder review.

Skills

Backend: Go, Python, Java, TypeScript, gRPC, Protocol Buffers, REST APIs, HTTP, RPC, Microservices, Service-Oriented Design
Data & Cloud: PostgreSQL, MySQL, SQL Server, SQL, Redis, GCP, AWS, Private Cloud, Kubernetes, Docker, Data Modeling
Testing & Delivery: Go Test, PyTest, Mockito, Unit Testing, Integration Testing, Contract Testing, GitLab CI, Jenkins, CI/CD, Git
Engineering: OOP, Concurrency, Async Processing, Error Handling, Debugging, Logging, Monitoring, Code Reviews, Jira, Agile, Acceptance Criteria

Projects

Omni-Channel Subscriber API Platform | *Go, gRPC, Protobuf, PostgreSQL, GCP, GitLab CI*

- Built an **omni-channel subscriber API platform** with Go and gRPC services for account, broadband, mobile, and video workflows, using versioned Protobuf contracts, validation interceptors, authentication, and centralized error mapping.

Service Contract Test Harness | *Go, Protobuf, gRPC, Docker, Go Test, Testcontainers*

- Developed a **contract-first integration test harness** that provisions containerized dependencies, validates Protobuf compatibility, exercises success and failure paths, detects breaking endpoint changes, and publishes results through GitLab CI pipelines.

Chat2SQL Code | *Java, TypeScript, SQL, Docker, Maven, Node.js* | GitHub

- Extended a cross-platform database workspace supporting 10+ databases through **object-oriented architecture, schema synchronization, validated query execution, containerized environments, and reusable integrations**, streamlining backend development across heterogeneous systems.
