Sahaj Bhadja

(213) 284-4651 sahaj.bhadja@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack Software Engineer with 2+ years delivering **responsive web applications, object-oriented services, AWS deployments, and automated quality controls** across the complete lifecycle from requirements analysis and prototyping through production support.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Web Technologies, Advanced NLP, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Data Structures, Object-Oriented Programming, Operating Systems

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Architected FastAPI services and Azure SQL workflows for 500+ users, reducing dashboard latency 71% through **object-oriented design, indexed queries, structured logging, error isolation, monitoring, and performance tuning**.
- Translated stakeholder workflows into scalable application features, processing 1K+ concurrent jobs at 3x throughput through **requirements analysis, prototyping, asynchronous orchestration, automated testing, deployment, and iterative production support**.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Delivered React and Flask workflows for uploads, history, approvals, and feedback, supporting 150+ instructors and 10K+ daily requests through **responsive interfaces, REST APIs, usability improvements, testing, and releases**.
- Built concurrent Python ingestion for PDF, DOCX, ZIP, OCR, and multimodal routing, reducing turnaround 60% while improving reliability through **unit tests, structured diagnostics, debugging, and automated failure recovery**.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer - (SecureSync) *India*

- Designed Java services and AWS data pipelines using object-oriented patterns, improving API response times 30% while reducing technical debt 20% through **modular architecture, caching, profiling, and resilient integrations**.
- Automated 20+ unit and integration suites across Windows and Linux using PyTest, Mockito, Jenkins, and virtual machines, strengthening **quality assurance, CI/CD validation, regression detection, and dependable multi-environment releases**.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern - (VibrantChem) *India*

- Built React and Node.js services for resources, billing, permissions, and notifications, synchronizing 2M+ records through **reusable components, REST APIs, WebSockets, authentication, responsive design, and maintainable frontend architecture**.
- Automated Docker and Jenkins deployments, reducing release time 50% while using Sentry, Azure Monitor, and Kibana for **application logging, exception tracing, system risk analysis, and continuous reliability improvement**.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Gathered client requirements and presented technical designs for 12+ integrations, mapping booking, payment, and status workflows through **application modeling, API contracts, interactive prototypes, and full-lifecycle implementation planning**.
- Built Flask and Firebase APIs supporting 50K+ records with sub-200-millisecond responses, delivering **integration testing, performance validation, stakeholder demonstrations, documentation, bug fixes, and responsive support** through production release.

Skills

Frontend: Angular, TypeScript, JavaScript, RxJS, React, HTML5, CSS3, Responsive Design, Component Architecture, State Management, Accessibility, UI Testing
Backend & Data: Java, Python, Node.js, Spring Boot, Flask, FastAPI, REST APIs, WebSockets, PostgreSQL, Azure SQL, MySQL, Redis, Data Modeling
AWS & DevOps: AWS, Lambda, API Gateway, ECS, S3, RDS, CloudWatch, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, Git, Deployment Automation
Engineering: Object-Oriented Analysis, Object-Oriented Design, Software Modeling, Full SDLC, Requirements Analysis, Prototyping, Code Analysis, Code Reviews, Unit Testing, Integration Testing
Quality & Operations: Quality Assurance, Debugging, Performance Tuning, Reliability Analysis, Risk Analysis, Logging, Error Handling, Monitoring, Documentation, Automation, Agile

Projects

CloudOps Service Portal | *Angular, TypeScript, Java, Spring Boot, AWS, PostgreSQL*

- Designed a **responsive Angular business application** for service requests, approvals, dashboards, and audit history, integrating Spring Boot APIs, reusable RxJS state flows, role-based access, validation, and AWS deployment.

AppReliability Workbench | *Angular, Java, AWS Lambda, CloudWatch, Docker*

- Built an **application analysis and observability console** combining code metrics, structured logs, error trends, performance traces, risk scoring, automated regression checks, deployment status, and guided remediation across environments.

Chat2SQL | *Java, TypeScript, SQL, Docker, Maven, Node.js* | Code

- Built a cross-platform **natural-language SQL workspace** supporting 10+ databases, schema synchronization, query validation, and Docker-based environments, enabling users to explore complex relational data through reproducible, database-aware workflows.
