Sahaj Bhadja

(213) 284-4651 sahaj.bhadja@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Engineer with 2+ years building **data-intensive financial and operational applications** using Python, SQL, React, TypeScript, cloud services, and APIs, with emphasis on correctness, auditability, stakeholder discovery, and production ownership.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Web Technologies, Advanced NLP, Analysis of Algorithms

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Data Structures, Object-Oriented Programming, Operating Systems

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Architected FastAPI services and normalized Azure SQL schemas for 500+ users, reducing dashboard latency 71% through **data modeling, validation, permissions, indexed queries, monitoring, and reliable production support**.
- Translated stakeholder workflows into scoped platform features, processing 1K+ concurrent jobs at 3x throughput through **requirements discovery, asynchronous orchestration, error handling, deployment ownership, and iterative user feedback**.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Delivered React and Flask workflows for uploads, approvals, history, and feedback, supporting 150+ instructors and 10K+ daily requests through **REST APIs, role-aware interfaces, testing, and production releases**.
- Built concurrent Python ingestion for PDF, DOCX, ZIP, OCR, and multimodal routing, reducing turnaround 60% while validating edge cases through **automated tests, structured logging, and failure recovery**.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer - (SecureSync) *India*

- Designed object-oriented APIs and cloud data pipelines using Python, SQL, AWS Glue, and S3, improving response times 30% while strengthening **integration reliability, data quality, and maintainable service boundaries**.
- Automated 20+ unit and integration suites across Windows and Linux using PyTest, Mockito, Jenkins, and virtual machines, increasing release confidence through **regression validation, debugging, and CI/CD controls**.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern - (VibrantChem) *India*

- Built React and Node.js services for billing, permissions, approvals, and notifications, synchronizing 2M+ records through **SQL-backed APIs, WebSockets, authentication, configurable finance workflows, and reusable TypeScript interface components**.
- Automated Docker and Jenkins deployments, cutting release time 50% while using Sentry, Azure Monitor, and Kibana for **audit-friendly monitoring, discrepancy investigation, incident response, and sustained production reliability**.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Gathered client requirements and presented technical designs for 12+ integrations, mapping booking, payment, coupon, and status workflows while **connecting business needs to implementation** and reducing design errors 25%.
- Built Flask and Firebase APIs supporting 50K+ financial records with sub-200-millisecond responses, delivering **payment-status validation, integration testing, stakeholder demonstrations, and responsive issue resolution** through reliable production release.

Skills

Languages & Web: Python, Go, TypeScript, JavaScript, Java, SQL, React, Node.js, Flask, FastAPI, HTML5, CSS3
Financial Systems: Invoicing, Credits, Approvals, Reconciliation, Financial Reporting, Audit Trails, Role-Based Access, Validation, Accounting Workflows, Revenue Operations
Data & Integrations: PostgreSQL, Azure SQL, Cloud SQL, BigQuery, MySQL, Redis, Data Modeling, Data Pipelines, REST APIs, WebSockets, NetSuite, Salesforce
Cloud & Delivery: Google Cloud, Cloud Run, AWS, Azure, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, Git, Monitoring, Structured Logging
AI & Engineering: LLMs, Tool Calling, Predictive Analytics, Prescriptive Analytics, Workflow Automation, Unit Testing, Integration Testing, Error Handling, Debugging, Agile, Code Reviews, Stakeholder Discovery

Projects

LedgerFlow Financial Operations | *Go, Python, React, TypeScript, Cloud SQL, Google Cloud*

- Designed a **financial operations application** for invoice previews, credits, approvals, configurable templates, and reconciliation, enforcing role permissions, validation rules, immutable audit trails, exception queues, and human review.

RevenueSync Analytics Hub | *Python, BigQuery, Cloud Run, NetSuite, Salesforce, LLMs*

- Built a **finance integration and decision-support pipeline** reconciling platform, NetSuite, Salesforce, and BigQuery records, surfacing discrepancies, forecasting cash timing, and generating traceable recommendations with approval-gated AI tool calls.

Chat2SQL | *Java, TypeScript, SQL, Docker, Maven, Node.js* | Code

- Built a cross-platform **natural-language SQL workspace** supporting 10+ databases, schema synchronization, query validation, and Docker-based environments, enabling users to explore complex relational data through reproducible, database-aware workflows.
