Sahaj Bhadja

(213) 284-4651 sahaj.bhadja@gmail.com sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer with 2+ years developing and supporting **object-oriented applications, REST services, relational databases, and automated tests**, with strong foundations in Java, SQL, debugging, documentation, and Agile delivery.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Advanced NLP, Analysis of Algorithms, Web Technologies

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Data Structures, Object-Oriented Programming, Operating Systems

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*

- Built an Azure-backed multi-tenant application with **normalized SQL schemas, row-level isolation, and indexed queries**, reducing dashboard latency from 1.2 seconds to 350 milliseconds for 500+ daily campus users.
- Translated stakeholder workflows into technical changes and reworked FastAPI orchestration with **unit-tested logic, debugging, monitoring, and process documentation**, tripling throughput for 1K+ concurrent production application processing jobs.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*

- Developed React and Flask features backed by **RESTful services and relational data models**, supporting 150+ instructors and 10K+ daily requests for uploads, grading history, model controls, and feedback.
- Implemented concurrent Python ingestion with **validation, automated testing, defect diagnosis, and user-facing error handling** for PDF, DOCX, ZIP, OCR, and multimodal workloads, reducing peak feedback turnaround 60%.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer - (SecureSync) *India*

- Designed cross-platform APIs and AWS data pipelines using **object-oriented architecture, Glue, S3, and SQL**, improving response times 30% while reducing technical debt 20% across complex business integrations.
- Automated 20+ unit and integration suites using PyTest, Mockito, Jenkins, and virtual machines, strengthening **interoperability, regression validation, defect resolution, and cross-platform application quality** across distributed customer services.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern - (VibrantChem) *India*

- Built eight modular services for authentication, resources, billing, and permissions, synchronizing 2M+ records through **REST APIs, relational schemas, reusable components, and responsive web interfaces** across distributed locations.
- Automated Docker and Jenkins releases, reducing deployment time 50% while applying **Sentry monitoring, structured logging, issue diagnosis, and rollback-ready CI/CD practices** across eight customer-facing production service environments.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*

- Translated customer workflows into technical specifications for 12+ integrations, mapping bookings, payments, coupons, and statuses into **reliable APIs, database schemas, queries, webhooks, and clearly documented application changes**.
- Built responsive interfaces and payment services processing 50K+ records with sub-200-millisecond responses, adding **input validation, authentication, defect handling, and integration testing** for accurate customer transactions across platforms.

Skills

Java & Web: Java, J2EE, EJB, Spring Boot, Maven, Angular, TypeScript, JavaScript, React, HTML5, CSS3, REST, SOAP, Web Services
Data & Reporting: SQL Server, PostgreSQL, MySQL, SQL, Stored Procedures, SSRS, SSIS, Relational Databases, Data Modeling, Queries, Reports, Business Intelligence
Testing & Support: JUnit, Mockito, Unit Testing, Integration Testing, Regression Testing, Debugging, Defect Resolution, Quality Assurance, Application Support, Helpdesk Escalation, Code Reviews
Delivery: Git, Jenkins, GitHub Actions, CI/CD, Docker, AWS, Azure, Linux, Version Control, Agile, Scrum, SDLC, Requirements Gathering, Technical Specifications
Engineering: Object-Oriented Programming, Data Structures, Algorithms, Systems Analysis, Process Automation, Application Maintenance, Technical Documentation, Project Planning, AI-Assisted Development, Data Privacy, Customer Service

Projects

Pension Benefits Workflow Platform | *Java, J2EE, Angular, SQL Server, SSRS*

- Designed a **multi-layer pension administration application** for member accounts, retirement estimates, benefit claims, approvals, and case status using Java services, Angular workflows, SQL Server procedures, and role-based access.

Member Service Automation Suite | *Java, Spring Boot, SOAP, REST, SQL Server, JUnit*

- Built a **member-service automation suite** converting manual requests into validated workflows, exposing REST and SOAP services, generating reports, and verifying application logic, stored procedures, failure paths, and integrations with JUnit.

Chat2SQL | *Java, TypeScript, SQL, Docker, Maven, Node.js*

- Extended a **cross-platform database workspace** supporting 10+ relational systems through Java and TypeScript, adding schema visualization, SQL execution, Docker-based environments, and documented workflows for repeatable testing and troubleshooting.
