Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Backend/platform-minded software engineer pursuing an MSCS at USC with 2+ years building APIs, data pipelines, and cloud-backed workflows. Strong in Python, SQL, Docker, Kubernetes, CI/CD, distributed systems fundamentals, Linux, and ramping quickly into Go-based infrastructure products.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Designed and optimized SQL-backed platform workflows supporting 500+ users, reducing latency from **1.2s to 350ms** through query tuning, profiling, and service fixes.
- Built validation pipelines processing 5,000+ monthly jobs with reconciliation checks, CI/CD releases, documentation, and runbooks, improving incident triage and production supportability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed React and Flask services handling 10,000+ daily requests, implementing REST APIs, debugging backend behavior, and writing tests that improved release confidence.
- Built automated document-processing workflows with OCR, Python services, and AWS-backed persistence, reducing turnaround by **60%** while documenting edge cases and integration failures.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*
- Built Python evaluation pipelines across 100,000+ records, producing reproducible traces, reports, and debugging artifacts that clarified model behavior and improved experimental reliability.
- Analyzed failure patterns across generated outputs and datasets, translating technical findings into actionable recommendations while strengthening validation coverage and engineering handoffs.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered API and ETL microservices using Python, AWS Glue, and S3, improving response time by **30%** while supporting scalable integrations and reliable production workflows.
- Maintained 20+ automated test suites using Jenkins, PyTest, and Mockito, increasing CI reliability by **68%**, reducing regressions, and accelerating defect isolation across services.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built a MERN-based platform with WebSockets and REST APIs, supporting 2M+ synchronized records and six workflows through modular services and responsive interfaces.
- Automated Docker-based build and test flows with Jenkins, cutting release time by **50%**, improving deployment consistency, and reducing friction during validation and troubleshooting.

Skills

Backend: Python, Java, Go fundamentals, TypeScript, JavaScript, SQL, REST APIs, microservices, service debugging
Infrastructure: Kubernetes, Docker, Linux, AWS, GCP, Azure familiarity, TCP/IP, TLS, HTTP, cloud resources, namespaces
DataOps: Apache Airflow familiarity, workflow orchestration, ETL, PostgreSQL, MySQL, MongoDB, pipeline validation
Delivery: Git/GitHub, Jenkins, CI/CD, incident review, runbooks, automated testing, code reviews, AI coding assistants

Projects

Linguistix Code | *Python, AWS, Docker, CI/CD*
- Developed an NLP service pipeline with containerized deployment and CI/CD automation, improving reproducibility, API reliability, and troubleshooting speed for model-backed workflows.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*
- Built an AI-powered SQL workspace supporting 10+ databases, combining schema inspection, query generation, Dockerized services, and debugging flows for faster data validation.

FinNexus Code | *Next.js, TypeScript, Kubernetes, MongoDB*
- Built a secure fintech platform supporting 50,000+ users and 1M+ transactions, combining Kubernetes deployment, real-time updates, and scalable service-backed workflows.
