Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer pursuing an MSCS at USC with 2+ years building **SaaS-style web applications**, **SQL-backed workflows**, and operational platforms, with C#/ASP.NET alignment, microservice experience, unit testing, and interest in warehouse software.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Designed and optimized SQL-backed SaaS workflows supporting 500+ users, reducing latency from **1.2s to 350ms** through query tuning, indexed access patterns, and structured backend improvements.
- Built ETL-style integration pipelines processing 5,000+ monthly jobs with validation, reconciliation, and CI/CD-backed releases, improving operational reliability and accelerating issue resolution across production systems.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed and tested full-stack application features handling 10,000+ daily requests, translating product needs into maintainable backend services and interfaces while improving debugging, release confidence, and documentation quality.
- Implemented secure batch-processing workflows for PDF, DOCX, and ZIP ingestion with AWS-backed persistence, reducing feedback turnaround by **60%** while supporting stable production operations and beta issue triage.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*
- Built Python-based experimentation pipelines across 100,000+ records, creating reproducible evaluations and technical artifacts that improved debugging quality, analysis consistency, and communication of system behavior.
- Produced technical reports and targeted validation scenarios translating findings into actionable improvements, supporting stronger design reviews, clearer handoffs, and better engineering decisions across collaborators.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered API and ETL microservices using Python, AWS Glue, and S3, improving response time by **30%** while supporting scalable data movement, structured delivery, and reliable production workflows.
- Maintained 20+ automated test suites using Jenkins, PyTest, and Mockito, increasing CI reliability by **68%**, reducing regressions, and improving confidence during collaborative release cycles.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built a resource management platform with WebSockets and REST APIs, supporting 2M+ synchronized records and six workflows through modular services, responsive interfaces, and maintainable integrations.
- Automated Docker-based build and test flows with Jenkins, cutting release time by **50%**, improving deployment consistency, and reducing friction during implementation, validation, and troubleshooting.

Skills

Languages: C# familiarity, JavaScript/TypeScript, Python, SQL, Java, C++
Application Development: ASP.NET Core familiarity, REST APIs, microservices, object-oriented design, performant code, unit testing
Frontend & Data: React, Next.js, HTML/CSS, SQL Server, PostgreSQL, MySQL, MongoDB, relational schema design
Tools & Delivery: Git/GitHub, Docker, Linux, Jenkins, CI/CD, Agile/Scrum, code reviews, debugging, DevOps practices

Projects

FinNexus Code | *Next.js, TypeScript, Kubernetes, MongoDB*
- Built a secure operational platform supporting 50,000+ users and 1M+ transactions, combining real-time updates, scalable data handling, and monitoring patterns relevant to inventory-style workflows.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*
- Built an AI-powered SQL workspace supporting 10+ databases, accelerating schema exploration, query authoring, and structured debugging of relational data workflows in enterprise-style environments.

Linguistix Code | *Python, AWS, Docker, CI/CD*
- Developed a containerized RESTful data processing API with automated CI/CD releases and validation checks, improving deployment reliability, interoperability, and supportability for production SaaS-style workflows.
