Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer pursuing an MSCS at USC with 2+ years building cloud-backed products, APIs, and operational workflows. Strong in Python, JavaScript/TypeScript, Java, SQL, Azure/AWS, Git, CI/CD, monitoring-minded releases, requirements breakdown, and stakeholder collaboration for reliable customer-facing systems.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built Azure SQL and cloud-storage workflows for 500+ users, translating stakeholder requirements into schemas, APIs, release tasks, and design notes for dependable feature delivery.
- Improved service reliability by tuning indexed access paths, validation jobs, and CI/CD-backed releases, reducing dashboard latency from **1.2s to 350ms** while supporting production handoffs.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed React and Flask product features serving **10,000+ daily requests**, breaking ambiguous user needs into API contracts, UI tasks, tests, and release-ready increments.
- Triaged defects across OCR, LLM, database, and file-ingestion workflows, documenting root causes and operational fixes that reduced instructor feedback turnaround by **60%**.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*
- Created Python evaluation pipelines across **100,000+** records, producing reproducible reports, metrics, and debugging artifacts to improve model behavior analysis and data quality.
- Partnered with researchers and engineers to refine requirements, summarize findings, and prioritize experiments, strengthening communication across technical and non-technical stakeholders.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered API and ETL microservices with Python, AWS Glue, and S3, improving response time by **30%** while supporting scalable integrations and reusable service logic.
- Maintained Jenkins pipelines and **20+** automated test suites with PyTest and Mockito, increasing CI reliability by **68%** and reducing regressions during releases.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built MERN features with WebSockets and REST APIs, supporting **2M+** synchronized records across modular services, responsive interfaces, and role-based workflows.
- Automated Docker and Jenkins build/test flows, cutting release time by **50%** while improving deployment consistency, documentation, and troubleshooting for distributed teams.

Skills

Languages: Python, JavaScript, TypeScript, Java, SQL, C, C++, Bash, HTML/CSS
Backend & Cloud: Flask, FastAPI, Node.js, REST APIs, Azure SQL, AWS S3/Glue/EC2, PostgreSQL, MySQL, MongoDB
Reliability: Git, CI/CD, Jenkins, GitHub Actions, Docker, Linux, monitoring, logs, incident triage, playbooks, automated testing
Engineering: Requirements analysis, design documents, task breakdown, code reviews, Agile/Scrum, stakeholder communication

Projects

Chat2SQL Code | *Java, TypeScript, SQL, Docker*
- Built an AI-powered SQL workspace supporting **10+** databases, accelerating schema exploration, query authoring, and cross-platform developer workflows with Java and TypeScript services.

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB*
- Built a fintech platform for **50,000+** users and **1M+** transactions, integrating Plaid, real-time updates, tokenized APIs, and CI/CD-backed Kubernetes deployment.

Big-Brain Live | *LLaMA-2, FAISS, PostgreSQL, GCP*
- Built a secure document Q&A platform with semantic search, summarization, and prompt workflows over **50K+** records, reducing review time by **60%**.
