Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Product-minded software engineer pursuing an MSCS at USC with 2+ years shipping React/Next.js interfaces, API-backed features, and data-driven workflows. Strong in TypeScript, Python, SQL, integrations, AI-agent-assisted development, and fast iteration across consumer product stacks.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Designed and optimized SQL-backed product workflows supporting 500+ users, reducing latency from **1.2s to 350ms** through query tuning, indexed access patterns, and service fixes.
- Built data validation pipelines processing 5,000+ monthly jobs with reconciliation checks, CI/CD releases, and runbooks, improving reliability for reporting and decision workflows.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed React and Flask product features handling 10,000+ daily requests, converting ambiguous user needs into responsive interfaces, REST APIs, tests, and release-ready increments.
- Built AI-assisted document workflows with OCR, LLM prompts, and AWS-backed persistence, reducing feedback turnaround by **60%** while documenting edge cases and integration failures.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*
- Built Python evaluation pipelines across 100,000+ records, producing reproducible reports, debugging artifacts, and visual summaries that clarified model behavior and data quality.
- Analyzed failure patterns across generated outputs and datasets, translating complex findings into actionable recommendations while strengthening validation coverage and technical decision-making.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered API and ETL microservices using Python, AWS Glue, and S3, improving response time by **30%** while supporting scalable integrations and reliable production workflows.
- Maintained 20+ automated test suites using Jenkins, PyTest, and Mockito, increasing CI reliability by **68%**, reducing regressions, and accelerating defect isolation across services.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built a MERN-based platform with WebSockets and REST APIs, supporting 2M+ synchronized records and six workflows through modular services and responsive interfaces.
- Automated Docker-based build and test flows with Jenkins, cutting release time by **50%**, improving deployment consistency, and reducing friction during validation and troubleshooting.

Skills

Frontend: React, Next.js, TypeScript, JavaScript, React Native familiarity, responsive UI, component architecture
Backend: Python, Flask, FastAPI, Node.js, REST APIs, C#/.NET familiarity, third-party integrations, auth patterns
Data & Cloud: SQL Server familiarity, PostgreSQL, MySQL, MongoDB, Azure familiarity, AWS, service queues, data-driven logic
AI & Delivery: Claude Code/Codex/Cursor workflows, test generation, codebase exploration, Git/GitHub, Docker, CI/CD, code reviews

Projects

PiXMod Live | *Next.js, MongoDB, Stripe, Transformers*
- Built an AI-powered SaaS web app with responsive Next.js flows, search, premium billing, and conversion-focused polish, improving user upgrade conversion by **18%**.

FinNexus Code | *Next.js, TypeScript, Kubernetes, MongoDB*
- Built a secure fintech platform supporting 50,000+ users and 1M+ transactions, combining real-time updates, scalable data handling, and personalized financial workflows.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*
- Built an AI-powered SQL workspace supporting 10+ databases, combining schema inspection, query generation, Dockerized services, and debugging flows for faster data validation.
