Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack software engineer with 2+ years building **React/Python applications**, automated data pipelines, document-processing systems, and fintech products; shipped scalable platforms handling 2M+ records, 1M+ transactions, and 10K+ daily requests across AWS and Azure.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Architected a **multi-tenant data platform** using Python, FastAPI, Azure SQL, and Blob Storage for 500+ users, reducing dashboard latency from 1.2 seconds to 350 milliseconds through schema and indexing optimization.
- Built **automated data-integration pipelines** processing 5,000+ monthly jobs with incremental loads, reconciliation, validation, error handling, and CI/CD releases, achieving 99%+ reliability across scalable recurring production workflows.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Built **full-stack React and Flask features** for document uploads, processing, history, and reporting, supporting 150+ users and 10,000+ daily requests while translating product needs into maintainable interfaces and APIs.
- Engineered **automated PDF, DOCX, and ZIP processing** with OCR, validation, concurrent execution, persistent results, and fallback handling, processing 1,000+ files per batch while reducing feedback turnaround 60%.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Troubleshot and optimized **API and ETL integrations** using OOP, AWS Glue, S3, SQL, caching, JSON, CSV, and Parquet transformations, improving response times 30%, pipeline efficiency 68%, and storage costs 15%.
- Owned **cross-platform delivery through Agile sprints**, maintaining 20+ unit/integration suites and Jenkins CI/CD across Windows, Linux, and macOS while collaborating with Microsoft and GitHub stakeholders to reduce technical debt 20%.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Developed **React, Node.js, and Azure SQL features** across eight microservices for authentication, records, billing, permissions, and notifications, synchronizing 2M+ records through REST APIs and WebSockets across locations.
- Automated **testing, Docker packaging, and staged deployments** through Jenkins CI/CD while using Sentry, Azure Monitor, and Kibana for troubleshooting, cutting release time 50% across fast-moving development cycles.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Developed **Python Flask APIs for secure financial workflows** covering bookings, pricing, payments, refunds, and webhook-driven updates, maintaining sub-200-millisecond responses across 50,000+ records through real-time Firebase synchronization.
- Built **automated payment and analytics workflows** across cards, wallets, refunds, disputes, Databricks, and Spark, reducing manual payment handling 70% while producing reliable hourly revenue and activity summaries.

Skills

Languages: Python, JavaScript, TypeScript, Java, C++, SQL, Bash, HTML, CSS
Full Stack: React.js, Next.js, FastAPI, Flask, Node.js, Express.js, REST APIs, WebSockets
Data & Automation: PostgreSQL, MySQL, SQL Server, Azure SQL, MongoDB, ETL, OCR, validation, reconciliation
Core CS: Data structures, algorithms, OOP, design patterns, distributed systems, concurrency, performance optimization
Delivery: AWS, Azure, Docker, Kubernetes, Git, GitHub Actions, Jenkins, CI/CD, PyTest, Jest, Agile/Scrum

Projects

FinNexus Live | *Next.js, TypeScript, Plaid, MongoDB, Kubernetes*
- Built a **financial data platform** supporting 50,000+ users and 1M+ transactions, integrating Plaid for secure account linking, real-time synchronization, advanced filtering, MongoDB access, and Kubernetes-based CI/CD automation.

Big-Brain Live | *LLaMA-2, PostgreSQL, GCP, FAISS*
- Built a **document-ingestion and semantic-search platform** processing 50,000+ documents with incremental indexing, metadata persistence, secure access, collaborative workflows, and AI summarization, reducing retrieval latency 40% and document review time 60%.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*
- Built an **AI-powered data application** supporting 10+ SQL and NoSQL systems, accelerating query authoring, schema exploration, and table management through a cross-platform Java backend and TypeScript interface with Docker workflows.
