Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Technology engineer with 2+ years implementing and maintaining **platform services, APIs, web applications, and SQL systems**; experienced in day-to-day operations, end-user enhancements, testing, troubleshooting, technical support, documentation, version control, and reliable launches.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Supported day-to-day operations for **Python platform services and SQL applications** serving 500+ users, enhancing indexed queries and reusable access patterns to reduce dashboard latency from 1.2 seconds to 350 milliseconds.
- Troubleshot **platform and integration problems** across 5,000+ monthly jobs, implementing validation, reconciliation, error handling, explicit states, and technical documentation to achieve 99%+ reliability through tested CI/CD launches.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Designed and built **React web applications and Flask API services** from end-user requirements, delivering upload, processing, history, and reporting capabilities supporting 150+ users and 10,000+ daily requests.
- Provided **technical support for production applications**, reproducing file-processing issues and deploying fixes with validation, persistent results, fallback handling, and automated tests, reducing user turnaround time 60% under peak usage.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Customized and enhanced **cross-platform application and API components** using OOP patterns, SQL, caching, AWS Glue, and S3, improving response times 30%, pipeline efficiency 68%, storage costs 15%, and maintainability.
- Maintained **version-controlled testing and delivery workflows** with GitHub, Jenkins, PyTest, and Mockito, generating coverage and failure reports while validating 20+ tests across Windows, Linux, and macOS software releases.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Implemented and maintained **React, Node.js, and Azure SQL applications** across eight services for authentication, records, billing, permissions, and notifications, integrating 2M+ records through REST APIs and real-time WebSockets.
- Assisted with **application testing, troubleshooting, and product launches** using Jest, Selenium, Sentry, Azure Monitor, Docker, and Jenkins CI/CD, fixing defects and cutting deployment time 50% while improving service reliability.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built **Spring Boot and Flask web services** for bookings, pricing, payments, and status updates, integrating Firebase persistence and validated webhooks while maintaining sub-200-millisecond responses across 50,000+ application records.
- Worked with customers to **translate requirements into application features**, mapping 12+ integrations and delivering unit-tested, documented enhancements that improved cross-platform compatibility 15%, reduced design errors 25%, and accelerated delivery 22%.

Skills

Languages: Python, Java, JavaScript, TypeScript, SQL, C++, Bash, HTML, CSS
Applications: FastAPI, Flask, Spring Boot, Node.js, React.js, REST APIs, web services, microservices, WebSockets
Databases: PostgreSQL, SQL Server, MySQL, Oracle, Azure SQL, MongoDB, schema design, indexing
Operations: Platform support, troubleshooting, application updates, testing, technical documentation, user support, monitoring, release operations
Delivery: Git, GitHub, Jenkins, GitHub Actions, CI/CD, Docker, PyTest, Mockito, Jest, Selenium, Agile/Scrum

Projects

Chat2SQL Code | *Java, TypeScript, Oracle, Docker, Maven*
- Enhanced a **cross-platform platform service and web application** across Java and TypeScript components, supporting 10+ SQL/NoSQL systems with APIs, schema exploration, query generation, Docker, Maven, and structured troubleshooting workflows.

HMIS Live | *MERN, Microservices, OOP*
- Developed and supported a **healthcare web application** with role-based workflows, REST integrations, TypeScript dashboards, notifications, and Sentry monitoring, halving record retrieval time while reducing administrative workload 30%.

Big-Brain Live | *React, PostgreSQL, GCP, REST APIs*
- Built a **secure platform application** processing 50,000+ documents with authenticated uploads, PostgreSQL metadata, REST APIs, incremental indexing, monitoring, and collaborative workflows, reducing retrieval latency 40% while improving maintainability.
