Sahaj Bhadja

(213) 284-4651 | bhadja@usc.edu | LinkedIn | GitHub | Portfolio

Summary

Full-stack software engineer with 2+ years building React/TypeScript interfaces, Python/FastAPI services, REST APIs, and AI-powered products. Experienced in SQL, AWS/Azure, LLM integration, Git, unit and integration testing, code review, Agile delivery, and production support.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built FastAPI endpoints, Azure SQL services, and React dashboards for 500+ users, following reusable component patterns while reducing production response latency from 1.2 seconds to 350 milliseconds.
- Implemented 5,000+ monthly workflows through explicit states, retries, reconciliation, and failure isolation, tripling throughput while improving API observability, maintainability, operational resilience, recovery, and systematic production issue diagnosis.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed React interfaces and Flask REST services handling 10,000+ daily requests, integrating OpenAI, Anthropic, and Qwen providers for document workflows while resolving production defects affecting 150+ users.
- Created multithreaded processing for 1,000+ files with validation, AWS RDS persistence, progress feedback, and failure recovery, reducing turnaround 60% while maintaining responsive behavior under concurrent production load.

USC AD Labs **Los Angeles, CA**
ML Research Assistant *January 2025 – May 2025*
- Built testable Python and PyTorch pipelines processing 100,000+ trajectory logs, improving planning accuracy 18% through reproducible experiments, structured model evaluation, performance monitoring, validation checks, and systematic debugging.
- Developed a spatial-temporal encoder combining map geometry and agent context through multi-head attention, improving closed-loop stability 15% while documenting experiments and validating outputs across diverse simulation scenarios.

Aasma Technology Solutions **India**
Software Developer Engineer – SecureSync *August 2023 – July 2024*
- Developed Python services and scalable REST integrations using AWS Glue, S3, SQL, filtering, pagination, and caching, improving production response times 30% and data-processing efficiency 68% across applications.
- Maintained 20+ automated unit and integration suites with Jenkins, PyTest, and Mockito, accelerating cloud troubleshooting, release verification, and reliable deployments across Windows, Linux, and macOS production environments.

Aasma Technology Solutions **India**
Full Stack Developer Intern – VibrantChem *May 2023 – August 2023*
- Developed modular React and Node.js features across eight microservices with authentication, role-based access, WebSocket messaging, and reusable components, securely processing 2 million+ Azure SQL records through documented interfaces.
- Automated Docker builds, functional tests, staged deployments, and production monitoring through Jenkins and Azure, reducing release time 50% while improving cloud reliability, deployment consistency, and operational visibility.

Skills

Frontend & Languages: JavaScript, TypeScript, Python, Java, SQL, React, Next.js, HTML5, CSS3, functional components, props, state, responsive interfaces, reusable components
Backend & AI: FastAPI, Flask, Node.js, REST APIs, microservices, OpenAI, Anthropic, Qwen, LLaMA-2, RAG, FAISS, embeddings, semantic search, prompt engineering
Data & Cloud: PostgreSQL, Azure SQL, MySQL, MongoDB, AWS RDS, AWS, Azure, S3, AWS Glue, Docker, Kubernetes, schema design, query optimization, caching
Quality & Delivery: Git, Jenkins, CI/CD, PyTest, Mockito, unit testing, integration testing, functional testing, automated testing, debugging, logging, monitoring, code review, documentation, Agile, Scrum, production support

Projects

Big-Brain | Live | *LLaMA-2, RAG, FAISS, PostgreSQL, REST APIs, Cloud Services*
- Built an authenticated RAG application processing 50,000+ unstructured documents with LLaMA-2, FAISS, PostgreSQL, and REST APIs, combining cloud deployment, semantic retrieval, structured validation, access controls, and real-time collaboration workflows.

PiXMod | Live | *Next.js, TypeScript, MongoDB, Stripe, CLIP, SAM*
- Built a full-stack AI application using Next.js, TypeScript, CLIP, and SAM, implementing reusable interfaces, structured image processing, secure authentication, MongoDB persistence, Stripe integration, and responsive cross-device workflows.

HMIS | Live | *TypeScript, React, REST APIs, Appwrite, Sentry, Twilio*
- Built responsive healthcare workflows for appointments, records, and consent-based access using React, REST APIs, authentication, Twilio notifications, and Sentry monitoring, supporting 100+ daily interactions while reducing administrative workload 30%.
