# Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

## Summary

Junior full-stack developer with 2+ years building **React, JavaScript, PHP/SQL, and backend applications**; experienced writing, testing, debugging, and documenting customer-facing features, REST APIs, MVC systems, and financial payment workflows.

## Education

**University of Southern California, Los Angeles, CA** **August 2024 – May 2026**
*Master of Science in Computer Science* *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

**Pandit Deendayal Energy University, Gandhinagar, India** **November 2020 – May 2024**
*Bachelor of Technology in Computer Science and Engineering* *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

## Experience

**USC Dornsife** **Los Angeles, CA**
*Software Engineer* *September 2025 – Present*

- Built **backend services and data-driven features** across FastAPI, PostgreSQL, SQL Server, and cloud storage, supporting 500+ users while reducing dashboard latency from 1.2 seconds to 350 milliseconds.
- Tested and debugged 5,000+ recurring complex production workflows using validation, reconciliation, explicit states, and error handling, sustaining 99%+ reliability while shipping maintainable enhancements through GitHub Actions.

**Grad8** **Los Angeles, CA**
*Software Engineer Intern* *June 2025 – August 2025*

- Developed **React interfaces and Flask REST APIs** for uploads, processing, history, reporting, and feedback, serving 150+ users and 10,000+ daily requests while reducing turnaround time 60%.
- Structured Flask Blueprints into maintainable MVC components, troubleshooting UI, API, and file-processing defects while incorporating code-review feedback and shipping tested improvements through standups and GitHub pull requests.

**Aasma Technology Solutions** **India**
*Software Developer Engineer - (SecureSync)* *August 2023 – July 2024*

- Developed **object-oriented API components** using Singleton and Factory patterns, SQL, caching, AWS Glue, and S3, improving response times 30%, pipeline efficiency 68%, and maintainability across existing systems.
- Collaborated with Microsoft and GitHub engineers through standups, code reviews, and team discussions while maintaining 20+ unit and integration tests with PyTest, Mockito, Jenkins, and GitHub Actions.

**Aasma Technology Solutions** **India**
*Full Stack Developer Intern - (VibrantChem)* *May 2023 – August 2023*

- Built **React and Node.js customer-facing features** across eight services for authentication, records, billing, permissions, and notifications, securely synchronizing 2M+ records through REST APIs, WebSockets, and Azure SQL.
- Tested complex production frontend, backend, and database workflows with Jest, Selenium, and Jenkins, achieving 95%+ build validation while reducing deployment time 50% and documenting evolving microservice interactions.

**LST Capitals** **India**
*Web Developer Intern* *November 2022 – January 2023*

- Developed **secure React, TypeScript, and Flask financial features** for pricing, payments, refunds, coupons, and transaction status, supporting 50,000+ records through real-time Firebase synchronization with sub-200-millisecond responses.
- Implemented secure multi-currency payment workflows across cards, wallets, and webhooks, reducing manual refund handling 70% while translating customer requirements into documented full-stack features across mobile and web.

## Skills

**Languages**: JavaScript, TypeScript, PHP, Python, SQL, Java, HTML, CSS
**Frontend**: React.js, Next.js, responsive design, component libraries, hooks, Material UI, TailwindCSS
**Backend**: Node.js, Express.js, Flask, FastAPI, REST APIs, MVC architecture, OOP, WebSockets
**Data & Payments**: MySQL, PostgreSQL, MongoDB, Firebase, payment workflows, webhooks, authentication
**Quality & Workflow**: Jest, PyTest, Mockito, Selenium, unit/integration testing, Git, code reviews, CI/CD, documentation

## Projects

**FinNexus** Live | *Next.js, TypeScript, Fintech, MongoDB*

- Built a **full-stack fintech platform** supporting 50,000+ users and 1M+ transactions with secure bank linking, token-based access, real-time updates, advanced filtering, MongoDB persistence, and Kubernetes-based CI/CD automation.

**Trend Tracker** Live | *React, Material UI, E-Commerce*

- Developed a **customer-facing e-commerce application** with reusable React and Material UI components and a CNN recommendation system, improving recommendation accuracy from 78% to 92% while serving 3M+ users and retaining 200,000+.

**Chat2SQL** Code | *Java, TypeScript, SQL, Docker*

- Enhanced a **cross-platform database application** across Java and TypeScript components, supporting 10+ SQL and NoSQL systems with reusable interfaces, schema exploration, query generation, Docker, Maven, and structured debugging workflows.
