Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack software engineer with 2+ years building **React, TypeScript, and Java applications**, secure APIs, and relational data systems; experienced translating requirements into tested, user-focused solutions through collaborative design, code review, and CI/CD.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built **secure services and schemas** with Python, FastAPI, PostgreSQL, and Azure SQL for 500+ users, implementing row-level isolation and indexed access patterns that reduced dashboard latency from 1.2 seconds to 350 milliseconds.
- Developed and tested **reliable application integrations** processing 5,000+ monthly workflows, applying validation, reconciliation, explicit states, and failure isolation while collaborating with stakeholders to maintain 99%+ production reliability through CI/CD.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Designed and developed **React and TypeScript user-facing features** with Flask APIs for uploads, processing, history, and reporting, supporting 150+ users and 10,000+ daily requests while reducing turnaround time 60%.
- Collaborated with users and engineers to **validate design approaches**, incorporate code-review feedback, and test secure file-processing integrations with persistent results, fallback handling, and fault-tolerant execution under peak demand.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered **Java application and API components** using object-oriented Singleton and Factory patterns, SQL, and caching, improving response times 30%, pipeline efficiency 68%, storage costs 15%, and code maintainability.
- Contributed to team design reviews and **version-controlled delivery processes** with Microsoft and GitHub stakeholders, automating Jenkins builds, releases, and 20+ unit and integration tests across three operating systems.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Developed **React and JavaScript member portal features** across eight Node.js services for authentication, records, billing, permissions, and notifications, integrating 2M+ records through REST APIs, WebSockets, and Azure SQL.
- Improved security, privacy, and application quality through **JWT role-based access and automated testing** with Jest, Selenium, and Sentry, shipping Docker releases through Jenkins while reducing deployment time 50%.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built **React, TypeScript, and Spring Boot application features** for bookings, pricing, payments, and status updates, integrating responsive interfaces, Firebase persistence, and validated webhooks while maintaining sub-200-millisecond responses.
- Partnered with customers to **translate business requirements into tested solutions**, mapping 12+ integrations and documenting system architecture while improving cross-platform compatibility 15%, reducing design errors 25%, and accelerating delivery 22%.

Skills

Languages: Java, TypeScript, JavaScript, Python, SQL, HTML, CSS, C++
Frontend: React.js, Next.js, Material UI, TailwindCSS, Shadcn, responsive design, component libraries, hooks
Backend: Spring Boot, FastAPI, Flask, Node.js, Express.js, REST APIs, microservices, WebSockets
Data & Security: PostgreSQL, MySQL, SQL Server, MongoDB, Azure SQL, authentication, role-based access, data privacy
Quality & Delivery: OOP, design patterns, Jest, Mockito, Selenium, PyTest, Git, code reviews, CI/CD, Docker, Agile/Scrum

Projects

HMIS Live | *React, TypeScript, REST APIs, Sentry*
- Built a **secure healthcare member application** with consent-based patient-history access, React and TypeScript dashboards, appointment workflows, REST integrations, notifications, and Sentry monitoring, halving retrieval time while reducing administrative workload 30%.

Trend Tracker Live | *React.js, Material UI, Strapi, AWS EC2*
- Developed a **React and Material UI customer experience** with reusable interface components and a CNN recommendation system, improving recommendation accuracy from 78% to 92% while serving 3M+ users and retaining 200,000+.

Chat2SQL Code | *Java, TypeScript, SQL, Docker, Maven*
- Enhanced an **AI-powered database application** across Java and TypeScript components, supporting 10+ SQL/NoSQL systems with schema exploration, query generation, reusable interfaces, Docker, Maven, and cross-platform development workflows.
