Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software quality analyst with 2+ years validating **cloud applications, data, integrations, and user workflows**; experienced developing manual test cases, executing regression tests, logging defects, verifying fixes, automating coverage, and supporting Agile releases.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Developed **manual data-validation and reconciliation scenarios** for 5,000+ monthly workflows across FastAPI, PostgreSQL, SQL Server, and cloud storage, sustaining 99%+ reliability through explicit states and error handling.
- Investigated application defects using logs, targeted test data, and expected-versus-actual analysis, then verified fixes across recurring releases while reducing dashboard latency from 1.2 seconds to 350 milliseconds.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Created and executed **repeatable comprehensive functional and regression test cases** for PDF, DOCX, image, and ZIP workflows spanning React interfaces, Flask APIs, databases, and multithreaded processing services.
- Clarified user-story requirements with users and developers, clearly logged reproducible defects with evidence, retested fixes, and supported CI/CD releases serving 150+ users and 10,000+ daily requests.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Developed **cross-platform QA workflows** across Windows, Linux, and macOS, maintaining 20+ unit and integration tests with PyTest, Mockito, Jenkins, and GitHub Actions for APIs and data pipelines.
- Collaborated with Microsoft and GitHub stakeholders to review requirements, reproduce integration failures, verify fixes, and automate nightly builds, installations, regression tests, and quality reports across Agile sprints.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Executed **complex cloud-based end-to-end application testing** across React, Node.js, REST APIs, WebSockets, eight microservices, and Azure SQL customer workflows synchronizing 2M+ records with authentication and role-based access.
- Carefully reproduced and documented defects using Sentry, Azure Monitor, Kibana, Jest, and Selenium evidence, achieving 95%+ build validation while testing hotfixes, minor changes, and full regression releases.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Mapped 12+ detailed customer workflows and developed **manual test coverage** for booking, pricing, coupons, payments, refunds, notifications, and status updates across React, Flask, Firebase, and third-party integrations.
- Compared expected and actual behavior across 50,000+ records, isolating API, webhook, and synchronization issues while documenting evidence and validating sub-200-millisecond responses across mobile and web platforms.

Skills

Quality Assurance: Manual testing, test cases, functional/regression testing, defect logging, retesting, release testing
Automation: PyTest, Mockito, Jest, Selenium, API testing, unit/integration testing, CI/CD, Jenkins
Applications: Angular.js, TypeScript, React.js, REST APIs, microservices, user workflows, Windows, Linux, macOS
Cloud & Data: Microsoft Azure, Azure SQL, PostgreSQL, SQL Server, MongoDB, analytics, Python, TensorFlow
Collaboration: Agile Scrum, user stories, Git, GitHub Actions, root-cause analysis, test evidence, documentation

Projects

HMIS Live | *TypeScript, REST APIs, Sentry*

- Tested a **cloud-based workflow application** spanning role-based access, patient-history retrieval, appointments, dashboards, notifications, REST integrations, and Sentry monitoring, halving record retrieval time while reducing administrative workload 30%.

CPU Scheduling Simulator Live | *C++, React, Test Design*

- Created and executed **functional test scenarios** for six scheduling algorithms, comparing expected and actual outputs across preemptive, non-preemptive, and edge cases with dynamic performance metrics over 1,000+ process combinations.

CaptionCraft Live | *Python, TensorFlow, Validation*

- Designed a **repeatable model-validation benchmark** across four vision architectures, 10,000 images, and 100,000 captions, analyzing failures and test results to improve accuracy from 81% to 96% while building inference APIs.
