Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer with 2+ years building **JavaScript/TypeScript web applications**, reusable platform services, developer workflows, and performance-focused interfaces; shipped secure, reliable React and Node.js systems handling 2M+ records and 10K+ daily requests.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built and maintained **web-platform services and data interfaces** for 500+ users, standardizing reusable access patterns and optimizing indexed queries to reduce application latency from 1.2 seconds to 350 milliseconds.
- Improved **platform robustness and reliability** across 5,000+ monthly workflows through validation, reconciliation, explicit states, failure isolation, and CI/CD releases, sustaining 99%+ production reliability while accelerating issue diagnosis.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Owned **React front-end development** for upload, processing, history, and reporting experiences, integrating Flask REST services and responsive components that supported 150+ users and 10,000+ daily requests reliably.
- Collaborated with users and engineers to **iterate on existing features**, translating workflow needs into maintainable UI and API enhancements while debugging production issues and reducing feedback turnaround time 60%.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Built **reusable developer tooling and API components** with OOP design patterns, SQL, caching, and response filtering, improving service latency 30%, pipeline efficiency 68%, storage costs 15%, and code maintainability.
- Automated **shared development and release workflows** with GitHub, Jenkins, and 20+ tests, generating coverage and failure reports while enabling consistent builds across Windows, Linux, and macOS engineering environments.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Developed **React, JavaScript, HTML/CSS, and Node.js product experiences** across eight services for authentication, records, billing, permissions, and notifications, synchronizing 2M+ records through performant REST APIs and WebSockets.
- Made the web platform **secure, reliable, and easier to operate** using JWT access, automated browser testing, Sentry, Azure Monitor, Docker, and Jenkins deployments, cutting release time 50%.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Built **React and TypeScript interfaces** with responsive HTML/CSS, real-time Firebase synchronization, and Flask APIs, delivering booking, pricing, payment, and status experiences across 50,000+ records at sub-200-millisecond latency.
- Translated stakeholder requirements into **end-to-end web enhancements**, mapping 12+ integrations and shipping version-controlled features across mobile and desktop clients that improved compatibility 15% and project delivery speed 22%.

Skills

Languages: JavaScript, TypeScript, HTML, CSS, Python, Java, SQL, C++
Web Platform: React.js, Next.js, Node.js, Express.js, REST APIs, WebSockets, responsive UI, microservices
Infrastructure: Performance optimization, caching, scalability, reliability, PostgreSQL, MySQL, MongoDB, AWS, Azure
Engineering: Data structures, algorithms, OOP, testing, debugging, Git, CI/CD, Jenkins, Docker, Agile/Scrum

Projects

Big-Brain Live | *React, Convex, FAISS, GCP*

- Built a **responsive collaborative web application** with secure uploads, real-time workflows, semantic search, and reusable interface components, processing 50,000+ documents while reducing retrieval latency 40% and review time 60%.

FinNexus Live | *Next.js, TypeScript, WebSockets, Kubernetes*

- Developed a **performant Next.js and TypeScript product** supporting 50,000+ users and 1M+ transactions, combining responsive interfaces, real-time WebSocket updates, advanced filtering, secure access, and Kubernetes-based CI/CD automation.

CPU Scheduling Simulator Live | *React.js, JavaScript, C++, Algorithms*

- Implemented **six scheduling algorithms and an interactive web interface** with React controls, Gantt visualization, edge-case handling, and live performance metrics across 1,000+ process combinations, cutting debugging time 20%.
