Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Java engineer with 2+ years delivering **Spring Boot, Python, and JavaScript applications**, cloud data systems, automated testing, CI/CD, and observability; translates complex business requirements into pragmatic solutions through clear client and team collaboration.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Designed **Python FastAPI services and relational data architecture** for 500+ users, implementing reusable access patterns, row-level isolation, and indexed queries that reduced application latency from 1.2 seconds to 350 milliseconds.
- Built **robust data and integration pipelines** across 5,000+ monthly jobs using SQL Server, PostgreSQL, validation, reconciliation, error handling, and CI/CD releases, achieving 99%+ production reliability for business workflows.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed **full-stack React and Flask solutions** for uploads, processing, history, and reporting, supporting 150+ users and 10,000+ daily requests through responsive interfaces, REST APIs, and maintainable MVC architecture.
- Integrated **AI and OCR tools through adaptable APIs**, adding usage logging, fallback handling, secure validation, and concurrent processing to solve complex instructor workflows while reducing feedback turnaround time 60%.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Designed **reusable object-oriented API and ETL components** using Singleton and Factory patterns, AWS Glue, S3, SQL, and caching, improving response times 30%, pipeline efficiency 68%, storage costs 15%, and maintainability.
- Collaborated with **Microsoft and GitHub stakeholders** through Agile sprints, automating builds, deployments, and 20+ tests with Jenkins, PyTest, and Mockito across Windows, Linux, and macOS client environments.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Implemented **React, Node.js, and Azure SQL solutions** across eight microservices for authentication, records, billing, permissions, and notifications, synchronizing 2M+ records through REST APIs and WebSockets across distributed locations.
- Established **automated verification, deployment, and observability** using Jest, Selenium, Sentry, Azure Monitor, Kibana, Docker, and Jenkins CI/CD, cutting release time 50% while improving operational integrity and defect resolution.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Developed **Spring Boot and Flask services** for bookings, pricing, payments, and status updates, integrating Firebase persistence and validated webhooks while maintaining sub-200-millisecond responses across 50,000+ application records.
- Worked directly with clients to **analyze business problems and design solutions**, mapping 12+ integration points and delivering unit-tested, version-controlled enhancements that improved cross-platform compatibility 15% and delivery speed 22%.

Skills

Languages: Java, Python, JavaScript, TypeScript, SQL, C++, Bash, HTML, CSS
Applications: Spring, Spring Boot, FastAPI, Flask, Node.js, React.js, Next.js, REST APIs, microservices
Data: SQL Server, PostgreSQL, Oracle, MongoDB, Azure SQL, Databricks, Spark, AWS Glue, ETL
Cloud & Delivery: AWS, Azure, Docker, Kubernetes, Git, GitHub Actions, Jenkins, CI/CD, Agile/Scrum
Quality & Observability: Mockito, PyTest, Jest, Selenium, Sentry, Azure Monitor, Kibana, unit/integration testing

Projects

Chat2SQL Code | *Java, TypeScript, Oracle, Docker, Maven*
- Enhanced an **AI-enabled database application** across Java and TypeScript modules, supporting Oracle and 10+ SQL/NoSQL systems with Maven, Docker, schema exploration, query generation, and cross-platform development workflows.

FinNexus Live | *Next.js, TypeScript, MongoDB, Kubernetes*
- Designed a **scalable financial data platform** supporting 50,000+ users and 1M+ transactions with secure integrations, real-time updates, MongoDB access, responsive interfaces, and Kubernetes-based CI/CD automation for reliable deployment.

Linguistix Code | *Python, AWS, Docker, CI/CD*
- Developed and deployed a **containerized Python analytics API** on AWS ECS/Fargate with CodePipeline, automated validation checks, and CI/CD releases, achieving 87% analytical accuracy and production-grade operational reliability at scale.
