Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Junior software developer with 2+ years building **Java, Spring Boot, REST API, and SQL-backed applications**; experienced across Agile SDLC, OOP, testing, debugging, root-cause analysis, CI/CD deployment, and production support.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Designed **database-backed Python services and relational schemas** for 500+ users, implementing row-level isolation, indexed queries, and reusable access patterns that reduced application latency from 1.2 seconds to 350 milliseconds.
- Maintained **production data and application workflows** across 5,000+ monthly jobs, troubleshooting malformed inputs and failed integrations through validation, reconciliation, error logs, and root-cause analysis to achieve 99%+ reliability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **full-stack React and Flask application features** for uploads, processing, history, and reporting, supporting 150+ users and 10,000+ daily requests within an established Blueprint-based MVC software architecture.
- Participated across the **Agile software development lifecycle**, translating requirements into APIs, validating functionality, debugging file-processing defects, reviewing code, and deploying enhancements through GitHub Actions while reducing turnaround time 60%.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Designed **clean, reusable object-oriented components** using Singleton and Factory patterns, APIs, SQL, AWS Glue, S3, and caching, improving response times 30%, pipeline efficiency 68%, storage costs 15%, and maintainability.
- Collaborated with developers and stakeholders through **Agile Scrum**, automating builds, deployments, and 20+ unit/integration tests with Jenkins, PyTest, and Mockito across Windows, Linux, and macOS application releases.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Developed and maintained **React, Node.js, and Azure SQL applications** across eight backend services for authentication, records, billing, permissions, and notifications, synchronizing 2M+ records through REST APIs and WebSockets.
- Worked with QA workflows to **troubleshoot defects and analyze logs** using Jest, Selenium, Sentry, Azure Monitor, and Kibana, then deployed tested Docker releases through Jenkins CI/CD with staged approvals.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Developed **Spring Boot and Flask backend services** for bookings, pricing, payments, and status updates, integrating Firebase persistence and validated webhooks while maintaining sub-200-millisecond responses across 50,000+ application records.
- Collaborated with clients and project teammates to **translate business requirements into technical solutions**, mapping 12+ integrations and delivering unit-tested, version-controlled enhancements that improved cross-platform compatibility 15% and delivery speed 22%.

Skills

Languages: Java, Python, JavaScript, TypeScript, SQL, C++, Bash, HTML
Java & Backend: Spring, Spring Boot, REST APIs, microservices, OOP, collections, design patterns, multithreading
Data: PostgreSQL, MySQL, SQL Server, Azure SQL, Oracle, MongoDB, Firebase, schema design
Quality & Delivery: Agile, SDLC, Git, Jenkins, CI/CD, Mockito, PyTest, Jest, Docker, Linux

Projects

Chat2SQL Code | *Java, TypeScript, Oracle, Docker, Maven*

- Enhanced an **AI database application** across Java and TypeScript, supporting Oracle and 10+ SQL/NoSQL systems with Maven, Docker, schema exploration, query generation, and cross-platform development and debugging workflows.

HMIS Live | *TypeScript, REST APIs, Sentry, Microservices*

- Built a **tested healthcare application** with secure record access, TypeScript dashboards, REST APIs, appointment flows, alerts, and Sentry monitoring, halving retrieval time and cutting administrative work 30%.

CPU Scheduling Simulator Live | *C++, React.js, Algorithms, Testing*

- Built and tested **six C++ scheduling algorithms** with React controls, Gantt charts, edge-case handling, and live metrics across 1,000+ process combinations, cutting turnaround 25% and debugging time 20%.
