Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack software engineer with 2+ years building **React, Node.js, Python, and database-backed applications**; delivers intuitive operational tools, APIs, reporting, integrations, and reliable cloud deployments through cross-functional collaboration and end-to-end ownership.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built **operational web services and data workflows** across FastAPI, PostgreSQL, SQL Server, and cloud storage, supporting 500+ users while reducing dashboard latency from 1.2 seconds to 350 milliseconds.
- Designed reliable normalized relational models and ETL integrations for 5,000+ monthly jobs, adding validation, reconciliation, incremental loading, logging, and failure isolation to sustain 99%+ production reliability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **customer-facing React interfaces and Flask APIs** for uploads, processing, history, and reporting, serving 150+ users and 10,000+ daily requests while reducing operational turnaround time 60%.
- Translated user workflows into responsive features and concurrent backend services, resolving file-processing defects and shipping tested enhancements through GitHub Actions while maintaining stable performance under peak load.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Engineered **cross-platform API and data integrations** using Python, AWS Glue, S3, SQL, and caching, improving response times 30%, increasing pipeline efficiency 68%, and reducing technical debt 20%.
- Collaborated with Microsoft and GitHub engineers on requirements, code reviews, and integration support while automating builds, deployments, monitoring reports, and 20+ tests across Windows, Linux, and macOS.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **React and Node.js operational tools** across eight services for resource allocation, customer records, billing, permissions, and notifications, synchronizing 2M+ records through WebSockets, REST APIs, and Azure SQL.
- Implemented deployment, monitoring, logging, and automated testing with Docker, Jenkins, Sentry, Azure Monitor, and Kibana, achieving 95%+ overall build validation and reducing staged production deployment time 50%.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Developed **React and TypeScript operational interfaces** with Flask APIs, Firebase synchronization, and reporting for booking, pricing, payment, and status workflows, supporting 50,000+ records with sub-200-millisecond responses.
- Partnered with customers to map 12+ integrations, translate operational needs into usable interfaces, and present end-to-end designs spanning responsive web experiences, validated webhooks, analytics, and multi-currency transactions.

Skills

Languages: JavaScript, TypeScript, Python, SQL, Java, HTML, CSS
Frontend: React.js, Next.js, responsive UI, UX/UI principles, component libraries, hooks, Material UI
Backend: Node.js, Express.js, FastAPI, Flask, REST APIs, WebSockets, webhooks, microservices
Data: PostgreSQL, SQL Server, Azure SQL, MongoDB, Firebase, data modeling, query optimization, reporting
DevOps: AWS, GCP, Azure, Docker, Kubernetes, GitHub Actions, Jenkins, CI/CD, monitoring, logging, testing

Projects

HMIS Live | *React, TypeScript, REST APIs, Sentry*

- Built a **full-stack internal operations application** with responsive dashboards, role-based workflows, REST integrations, authentication, appointments, notifications, and Sentry monitoring, halving record retrieval time while reducing administrative workload 30%.

FinNexus Live | *Next.js, TypeScript, MongoDB, Kubernetes*

- Developed a **scalable financial transaction platform** supporting 50,000+ users and 1M+ transactions with secure integrations, real-time updates, advanced filtering, MongoDB persistence, and reliable Kubernetes-based CI/CD automation.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*

- Enhanced a **cross-platform data-management application** supporting 10+ SQL and NoSQL systems with schema exploration, query generation, structure synchronization, Docker workflows, compatibility checks, and reusable integrations across operating systems.
