Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Application developer with 2+ years building **Angular/TypeScript, Node.js, Azure, SQL Server, REST API, ETL, and AI solutions**; experienced designing, testing, deploying, troubleshooting, documenting, and supporting scalable enterprise applications through CI/CD.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Designed **Azure SQL, SQL Server, PostgreSQL, and FastAPI solutions** supporting 500+ users, translating specifications into normalized schemas and optimized APIs that reduced dashboard latency from 1.2 seconds to 350 milliseconds.
- Built ETL integrations and intelligent automation processing 5,000+ monthly workflows, implementing validation, reconciliation, failure isolation, and CI/CD-backed releases while sustaining 99%+ production reliability and improving throughput 3x.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **React interfaces and modular Flask REST APIs** for uploads, dashboards, processing, history, and reporting, serving 150+ users and 10,000+ daily requests with stable production performance.
- Integrated OpenAI, Claude, and Qwen behind adaptable services, translating user requirements into AI-driven workflows and shipping tested production enhancements through Agile planning, code reviews, Git, and CI/CD.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Designed **object-oriented microservices and REST integrations** using Singleton and Factory patterns, optimizing APIs and AWS Glue ETL pipelines to improve response times 30%, efficiency 68%, and maintainability.
- Collaborated with Microsoft and GitHub engineers to clarify specifications, review code, troubleshoot production issues, and automate builds, unit tests, integration tests, deployments, and reports through Jenkins CI/CD.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Developed **reliable React, TypeScript, Node.js, and Azure SQL application features** across eight microservices for authentication, resource management, billing, permissions, notifications, analytics, and real-time synchronization of 2M+ records.
- Planned system tests and deployments using Docker and Jenkins, troubleshooting root causes through Sentry, Azure Monitor, and Kibana while achieving 95%+ build validation and reducing deployment time 50%.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Built **React, TypeScript, and Flask applications** for booking, pricing, payments, refunds, and status workflows, integrating Firebase and third-party REST APIs across 50,000+ records with sub-200-millisecond responses.
- Translated customer needs into technical designs documenting 12+ interfaces, then developed, tested, deployed, and supported secure multi-currency workflows while reducing manual refund handling 70% through webhook automation.

Skills

Languages: TypeScript, JavaScript, Python, SQL, Java, HTML5, CSS3, Bash
Frontend: Angular.js, React.js, Node.js, Material UI, Bootstrap, responsive design, component libraries
Backend & Data: REST APIs, microservices, FastAPI, Flask, SQL Server, Azure SQL, PostgreSQL, ETL
Cloud & AI: Microsoft Azure, AWS, Docker, Kubernetes, machine learning, LLM APIs, intelligent automation
Delivery: SDLC, Agile Scrum, technical design, unit/system testing, Git, Jenkins, GitHub Actions, CI/CD, support

Projects

Chat2SQL Code | *Java, TypeScript, SQL Server, Docker*

- Enhanced an existing **enterprise-style database application** across Java and TypeScript modules, supporting SQL Server and 10+ systems with schema exploration, interface upgrades, query generation, Docker, Maven, and cross-platform workflows.

Big-Brain Live | *AI, PostgreSQL, REST APIs*

- Built an **AI-driven data application** processing 50,000+ documents with authenticated uploads, incremental indexing, PostgreSQL metadata, semantic retrieval, REST APIs, and collaborative workflows, reducing retrieval latency 40% and review time 60%.

FinNexus Live | *TypeScript, REST APIs, CI/CD*

- Developed a **scalable transaction application** supporting 50,000+ users and 1M+ records with secure REST integrations, real-time updates, advanced filtering, MongoDB persistence, responsive TypeScript interfaces, and Kubernetes-based CI/CD automation.
