Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack software engineer with 2+ years shipping **React, Python, and Node.js applications** across healthcare, finance, and data platforms; delivered secure systems handling 2M+ records, 1M+ transactions, and 10K+ daily requests reliably.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Architected a **multi-tenant product data model** using Python, FastAPI, Azure SQL, and Blob Storage for 500+ users, enforcing row-level isolation while reducing dashboard latency from 1.2 seconds to 350 milliseconds.
- Built **reliable automation workflows** processing 5,000+ monthly jobs with explicit states, incremental loads, reconciliation, validation, failure isolation, and CI/CD releases, achieving 99%+ reliability across recurring production operations.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Owned **full-stack React and Flask features** for uploads, processing, history, and reporting, translating user needs into maintainable interfaces and APIs supporting 150+ users and 10,000+ daily requests.
- Engineered **secure document-processing workflows** for PDF, DOCX, and ZIP inputs with OCR, validation, concurrent execution, persistent results, and fallback handling, processing 1,000+ files per batch while reducing turnaround 60%.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Troubleshot and optimized **large-scale API and ETL integrations** using OOP, AWS Glue, S3, SQL, caching, JSON, and Parquet transformations, improving response times 30%, pipeline efficiency 68%, and storage costs 15%.
- Owned **cross-platform delivery through Agile sprints**, maintaining 20+ unit/integration suites and Jenkins CI/CD across Windows, Linux, and macOS while collaborating with Microsoft and GitHub stakeholders to reduce technical debt 20%.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Developed **React, Node.js, and Azure SQL product surfaces** across eight microservices for authentication, records, billing, permissions, and notifications, synchronizing 2M+ records through REST APIs and WebSockets across locations.
- Implemented **role-based access, JWT security, automated testing**, and Docker deployments through Jenkins CI/CD while using Sentry and Azure Monitor for debugging, cutting release time 50% across fast-moving product cycles.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Developed **Python Flask APIs for payment workflows** covering pricing, discounts, bookings, refunds, and webhook-driven status updates, maintaining sub-200-millisecond responses across 50,000+ records through real-time Firebase synchronization.
- Implemented **multi-currency financial workflows** across cards, wallets, refunds, disputes, and payment webhooks, reducing manual handling 70% while preserving consistent transaction state through robust validation and idempotent processing.

Skills

Languages: Python, JavaScript, TypeScript, SQL, Java, C++, HTML, CSS
Frontend: React.js, Next.js, TailwindCSS, responsive UI, component-based interfaces
Backend: FastAPI, Flask, Node.js, Express.js, REST APIs, WebSockets, microservices, business-logic workflows
Data & Quality: PostgreSQL, MySQL, SQL Server, Azure SQL, MongoDB, schema design, PyTest, Jest, Selenium
Platform: AWS, Azure, Docker, Kubernetes, Git, GitHub Actions, Jenkins, CI/CD, Sentry, Agile/Scrum

Projects

HMIS Live | *TypeScript, MERN, Healthcare APIs, TailwindCSS*
- Built a **secure healthcare operations platform** with consent-based record access, appointment workflows, TypeScript dashboards, API integrations, notifications, and Sentry monitoring, reducing record retrieval time 2x and administrative workload 30%.

FinNexus Live | *Next.js, TypeScript, MongoDB, Kubernetes*
- Built a **financial data platform** supporting 50,000+ users and 1M+ transactions, integrating Plaid for secure account linking, real-time synchronization, advanced filtering, MongoDB access, and Kubernetes-based CI/CD automation.

Big-Brain Live | *LLaMA-2, PostgreSQL, GCP, FAISS*
- Built a **secure document and collaboration product** with authenticated uploads, semantic search, summarization, and real-time workflows, processing 50,000+ documents while reducing retrieval latency 40% and review time 60%.
