Sahaj Bhadja

(213) 284-4651 | bhadja@usc.edu | LinkedIn | GitHub | Portfolio

Summary

Product-oriented software engineer with 2+ years building React Native mobile applications, Next.js products, REST APIs, and AI-enabled workflows. Experienced in iOS/Android delivery, authentication, payments, database design, responsive UX, testing, CI/CD, and production deployment.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Built Python APIs, Azure SQL services, and responsive product dashboards for 500+ users, translating stakeholder requirements into maintainable workflows while reducing production latency from 1.2 seconds to 350 milliseconds.
- Orchestrated 5,000+ monthly jobs through explicit states, retries, reconciliation, and failure isolation, tripling throughput while improving API observability, operational resilience, recovery, maintainability, and systematic production issue diagnosis.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Developed React interfaces and Flask REST services handling 10,000+ daily requests, implementing user workflows, authentication, progress feedback, and reusable components while resolving production defects and supporting 150+ users.
- Created multithreaded processing for 1,000+ files with validation, AWS RDS persistence, progress monitoring, and failure recovery, reducing turnaround 60% while maintaining responsive behavior under concurrent production load.

Aasma Technology Solutions **India**
Software Developer Engineer – SecureSync *August 2023 – July 2024*
- Developed Python services and REST integrations using object-oriented patterns, filtering, pagination, caching, AWS Glue, S3, and SQL, improving production response times 30% and data-processing efficiency 68% across applications.
- Maintained 20+ automated unit and integration suites with Jenkins, PyTest, and Mockito, documenting test evidence while accelerating defect correction, release verification, and reliable deployments across Windows, Linux, and macOS.

Aasma Technology Solutions **India**
Full Stack Developer Intern – VibrantChem *May 2023 – August 2023*
- Developed modular React and Node.js product features across eight microservices with authentication, role-based access, responsive workflows, and real-time updates, securely processing 2 million+ Azure SQL application records.
- Automated Docker builds, functional tests, staged deployments, and production monitoring through Jenkins and Azure, reducing release time 50% while improving service reliability, deployment consistency, and operational visibility.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built React Native clients for iOS and Android with Firebase persistence, real-time state synchronization, image storage, push notifications, and secure sessions across a consumer mobile platform handling 50,000+ records.
- Developed Flask REST APIs for bookings, pricing, and payments, delivering sub-200-millisecond responses and reliable webhook-driven integrations that improved confirmation speed 40% across customer-facing interactive mobile application workflows.

Skills

Mobile & Frontend: React Native, React, Next.js, TypeScript, JavaScript, HTML5, CSS3, iOS, Android, responsive UI/UX, reusable components, cross-device workflows
Backend & Product: Python, Node.js, Flask, FastAPI, REST APIs, WebSockets, webhooks, microservices, authentication, authorization, role-based access, product analytics, real-time synchronization
Data & Payments: PostgreSQL, Azure SQL, MySQL, MongoDB, Firebase, AWS RDS, Stripe, database design, schema design, secure sessions, payment workflows, caching
Cloud & Delivery: AWS, Azure, S3, Docker, Kubernetes, Git, Jenkins, CI/CD, unit testing, integration testing, functional testing, debugging, monitoring, code review, documentation, Agile, production support

Projects

PiXMod | Live | *Next.js, TypeScript, MongoDB, Stripe, CLIP, SAM*
- Built a full-stack AI application using Next.js, TypeScript, CLIP, and SAM, implementing reusable interfaces, structured image processing, secure authentication, MongoDB persistence, Stripe integration, and responsive cross-device workflows.

FinNexus | Live | *TypeScript, Next.js, REST APIs, WebSockets, MongoDB, Kubernetes*
- Built a responsive platform supporting 50,000+ users and one million transactions, integrating secure APIs, real-time WebSocket synchronization, MongoDB persistence, reusable interfaces, Kubernetes deployment, and automated release workflows.

HMIS | Live | *TypeScript, React, REST APIs, Appwrite, Sentry, Twilio*
- Built responsive healthcare workflows for appointments, records, and consent-based access using React, REST APIs, authentication, Twilio notifications, and Sentry monitoring, supporting 100+ daily interactions while reducing administrative workload 30%.
