Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Full-stack software engineer with 2+ years building **TypeScript, React, Node.js, and data-pipeline products**; owns customer-facing features end-to-end, translates ambiguous needs into sprint requirements, and ships robust AI-enabled software through iterative delivery.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Owned **customer-facing platform features** from requirements through release for 500+ users, pairing responsive data workflows with indexed SQL access to reduce dashboard latency from 1.2 seconds to 350 milliseconds.
- Built ingestion and transformation pipelines across FastAPI, SQL Server, PostgreSQL, and cloud storage, processing 5,000+ monthly jobs with validation, reconciliation, incremental loads, and 99%+ production reliability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Delivered **React customer experiences and Flask services** for uploads, grading, feedback, and history, serving 150+ users and 10,000+ daily requests while reducing feedback turnaround time 60%.
- Integrated OpenAI, Claude, and Qwen behind adaptable APIs, implementing NLP prompt chains, output validation, usage tracking, and fallback behavior to ship reliable AI workflows despite ambiguous product requirements.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Engineered **multi-source ingestion and API pipelines** using AWS Glue, S3, SQL, caching, and reusable services, increasing transformation efficiency 68%, reducing response times 30%, and cutting payload sizes 25%.
- Worked directly with Microsoft and GitHub stakeholders to clarify requirements, prioritize sprint work, review code, troubleshoot integrations, and ship 20+ automated tests through cross-platform production CI/CD pipelines.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **React and Node.js customer tools** across eight services for authentication, records, billing, permissions, and notifications, synchronizing 2M+ records through WebSockets and REST APIs with secure access.
- Used customer and product analytics to identify workflow friction, reducing resource wastage 42% and increasing lead conversion 15% while shipping tested Docker releases through Jenkins 50% faster.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Developed **React and TypeScript customer interfaces** with real-time Firebase synchronization and Flask services for booking, pricing, payments, and status updates, supporting 50,000+ records with sub-200-millisecond responses.
- Met directly with customers to resolve ambiguous requirements, present system designs, and deliver end-to-end features spanning responsive interfaces, data pipelines, validated webhooks, reporting, and multi-currency transaction workflows.

Skills

Languages: TypeScript, JavaScript, Python, SQL, Java, HTML, CSS
Frontend: React.js, Next.js, responsive UI, component libraries, hooks, TailwindCSS, Material UI
Backend: Node.js, Express.js, FastAPI, Flask, REST APIs, WebSockets, microservices, authentication
Data & AI: PostgreSQL, MongoDB, Azure SQL, Firebase, ingestion pipelines, NLP, LLM APIs, semantic search
Delivery: Product ownership, customer discovery, sprint requirements, Git, CI/CD, Docker, testing, monitoring

Projects

Big-Brain Live | *React, FAISS, PostgreSQL, Convex*

- Built a **customer-facing document insight product** processing 50,000+ documents with authenticated uploads, collaborative React workflows, semantic search, NLP summarization, and incremental pipelines, reducing retrieval latency 40% and review time 60%.

FinNexus Live | *Next.js, TypeScript, MongoDB*

- Shipped a **full-stack financial product** supporting 50,000+ users and 1M+ transactions with responsive React interfaces, real-time updates, secure integrations, advanced filtering, MongoDB persistence, and Kubernetes-based CI/CD automation.

Trend Tracker Live | *React, Material UI, CNN*

- Developed a **customer-focused React and Material UI experience** with reusable components and a CNN-based recommendation workflow, improving recommendation accuracy from 78% to 92% while serving 3M+ users and retaining 200,000+.
