Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software engineer with 2+ years supporting **CRM, web, and integration systems**; experienced translating stakeholder requirements into secure configurations, reusable interfaces, API and webhook workflows, structured schemas, data-quality controls, automated testing, monitoring, and production releases.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Designed **normalized application schemas and secure access controls** using relational databases for 500+ users, applying row-level isolation and indexed field access to reduce dashboard latency from 1.2 seconds to 350 milliseconds.
- Maintained **data quality and cross-system integration workflows** processing 5,000+ monthly jobs, implementing field validation, schema-aligned transformations, reconciliation, error handling, and CI/CD-backed fixes that sustained 99%+ production reliability.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Translated user requirements into **React, JavaScript, HTML/CSS web assets** and Flask API workflows for secure uploads, processing, history, and reporting, supporting 150+ users and 10,000+ daily requests.
- Troubleshot API-related failures and validation errors across file and AI integrations, configuring reusable processing flows, persistent results, fallback handling, and automated tests while reducing stakeholder turnaround time 60%.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Configured and enhanced **cross-system API and data integrations** using SQL, caching, AWS Glue, and S3, improving response times 30%, pipeline efficiency 68%, storage costs 15%, and compatibility across three operating systems.
- Partnered with Microsoft and GitHub stakeholders to scope changes, review configurations, troubleshoot failures, and validate releases using Git, Jenkins, automated reporting, and 20+ unit and integration tests.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built and supported a **CRM platform** with React, Node.js, and Azure SQL, modeling users, customers, leads, activities, permissions, notifications, billing, and reporting across eight services and 2M+ synchronized records.
- Managed account access and role governance with JWT controls, monitored feature engagement and system health through Google Analytics, Sentry, Azure Monitor, and Kibana, and reduced synchronization conflicts 33%.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built **REST APIs and webhook integrations** for bookings, pricing, payments, and status updates across 50,000+ records, using validation, idempotent processing, and Firebase synchronization to maintain sub-200-millisecond responses.
- Mapped 12+ integration points and translated client requirements into documented technical workflows, compatibility checks, and tested enhancements, improving cross-platform support 15%, reducing design errors 25%, and accelerating delivery 22%.

Skills

Languages: JavaScript, TypeScript, HTML, CSS, Python, Java, SQL, Bash
CRM & Integration: CRM data modeling, field mapping, schema alignment, REST APIs, webhooks, JSON, synchronization
Web: React.js, Next.js, Node.js, Express.js, FastAPI, Flask, responsive forms, reusable components
Data & Governance: Azure SQL, PostgreSQL, MySQL, MongoDB, data types, validation, access controls, data quality
Operations: Git, CI/CD, Jenkins, Docker, testing, troubleshooting, Sentry, Azure Monitor, Google Analytics, documentation

Projects

Trend Tracker Live | *React.js, Material UI, Strapi, AWS EC2*
- Developed a **customer-facing marketing and recommendation platform** using React, Material UI, Strapi, and AWS EC2, improving recommendation accuracy from 78% to 92% while serving 3M+ users and retaining 200,000+.

Chat2SQL Code | *Java, TypeScript, SQL, Docker, Maven*
- Enhanced an **AI-assisted database management application** across Java and TypeScript components, supporting 10+ SQL/NoSQL systems with schema exploration, structure synchronization, query generation, reusable interfaces, Docker, Maven, and reporting workflows.

FinNexus Live | *Next.js, REST APIs, MongoDB, Kubernetes*
- Built a **secure integration platform** supporting 50,000+ users and 1M+ transactions with third-party bank linking, real-time synchronization, structured filtering, token-based access, MongoDB persistence, and Kubernetes-based CI/CD automation.
