Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Frontend software engineer with 2+ years building **React/TypeScript web applications**, tested UI components, and financial workflows; experienced translating requirements into responsive HTML/CSS interfaces, integrating Node.js APIs, incorporating review feedback, and shipping incrementally through Git.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Object-Oriented Programming, Software Engineering, Operating Systems, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*

- Built and updated **data-backed portal experiences** for 500+ users, collaborating on requirements and optimizing indexed queries and reusable access patterns to reduce dashboard latency from 1.2 seconds to 350 milliseconds.
- Delivered **well-scoped application enhancements** through incremental Agile workflows, adding validation, reconciliation, explicit job states, and failure handling across 5,000+ monthly processes while sustaining 99%+ reliability through tested CI/CD releases.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*

- Developed **React and TypeScript user interfaces** for uploads, processing, grading history, and reporting, translating instructor requirements into responsive components backed by Flask APIs for 150+ users and 10,000+ daily requests.
- Responded to **code-review feedback and shipped incremental improvements** through GitHub pull requests, adding validation, persistent results, usage logging, fallback handling, and automated deployments while reducing user turnaround time 60%.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*

- Collaborated with **Microsoft and GitHub engineers through Agile sprints**, clarifying requirements, opening pull requests, responding to review comments, and delivering reusable API components that improved response times 30%.
- Wrote and maintained **20+ unit and integration tests** with PyTest and Mockito, automating Git/Jenkins build, validation, and release workflows across Windows, Linux, and macOS while reducing technical debt 20%.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*

- Built **React and JavaScript portal features** across eight Node.js services for authentication, records, billing, permissions, and notifications, synchronizing 2M+ records through REST APIs, WebSockets, and Azure SQL.
- Tested **UI components and end-to-end workflows** with Jest and Selenium, incorporating feedback through Git-based reviews and deploying Docker releases through Jenkins CI/CD, cutting release time 50% while improving reliability.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*

- Developed **React and TypeScript financial interfaces** with responsive HTML/CSS, real-time Firebase synchronization, and Flask APIs, delivering pricing, booking, payment, refund, and status experiences across 50,000+ records.
- Collaborated with clients to **turn specifications into working UI**, mapping 12+ integrations and shipping unit-tested, version-controlled enhancements that improved cross-platform compatibility 15%, reduced design errors 25%, and accelerated delivery 22%.

Skills

Languages: TypeScript, JavaScript, HTML, CSS, Python, SQL, Java
Frontend: React.js, Next.js, Material UI, TailwindCSS, responsive design, component libraries, hooks, dashboards
Backend & Data: Node.js, Express.js, Flask, REST APIs, PostgreSQL, MySQL, MongoDB, Firebase, WebSockets
Testing: Jest, Selenium, PyTest, unit testing, integration testing, end-to-end testing, API mocking
Workflow: Git, GitHub, pull requests, code reviews, Jira, Agile/Scrum, CI/CD, Jenkins, GitHub Actions

Projects

FinNexus Live | *Next.js, TypeScript, MongoDB, TailwindCSS*

- Built a **responsive financial-services portal** supporting 50,000+ users and 1M+ transactions with Next.js, TypeScript, TailwindCSS, secure bank linking, real-time updates, advanced filtering, MongoDB access, and CI/CD automation.

HMIS Live | *TypeScript, TailwindCSS, REST APIs, Sentry*

- Developed a **user-facing TypeScript operations portal** with responsive dashboards, REST integrations, authentication, appointment workflows, notifications, and Sentry monitoring, halving record retrieval time while reducing administrative workload 30%.

Big-Brain Live | *React, Convex, Shadcn, Clerk*

- Created a **secure collaborative React application** with authenticated uploads, reusable Shadcn components, real-time Convex workflows, semantic search, and summarization, processing 50,000+ documents while reducing retrieval latency 40%.
