Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahaj-bhadja sahaj-bhadja

Summary

Software engineer with 2+ years building **front-end** and full-stack web products. Strong in **React**, **TypeScript**, **JavaScript**, and tested user-facing features.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
M.S. in Computer Science *GPA: 3.75/4*
Coursework: Algorithms, Databases, Web Tech, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
B.Tech. in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Eng., OS, OOP, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Architected multi-tenant platform services on Azure SQL and Blob Storage for 500+ users, optimizing queries to cut dashboard latency from 1.2s to 350ms.
- Built fault-tolerant async workflows for 1K+ AI jobs with state transitions and failure isolation, improving throughput 3x while supporting dependable releases.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Engineered Flask services, REST APIs, and instructor-facing React workflows handling 10K+ daily requests, integrating secure file ingestion, grading pipelines, and polished user experiences.
- Designed concurrent batch-processing for 1K+ uploaded files using multithreading and AWS RDS-backed services, reducing turnaround time by 60% while maintaining stable APIs in production.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered cross-platform software with microservices, Jenkins, PyTest, and Mockito, improving release reliability through 20+ automated test suites across Windows, Linux, and macOS.
- Optimized API and ETL workflows with AWS Glue, S3, and SQL-backed services, improving response times by 30% and pipeline efficiency by 68%.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Developed full-stack workflow software using REST APIs, WebSockets, and responsive interfaces, supporting 2M+ synchronized records while improving operational visibility, coordination, and usability.
- Automated Docker-based build and deployment workflows with Jenkins CI/CD, cutting release time by 50% and improving troubleshooting speed, environment consistency, and delivery reliability.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built backend APIs for a cross-platform booking application, covering reservations, scheduling, status updates, and payment workflows across 50K+ records through reliable Flask services.
- Mapped 12+ integration points and implemented payment and sync features with Flask, Firebase, and webhooks, reducing manual payment handling by 70%.

Skills

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, responsive UI, accessibility, components
Backend & APIs: Flask, FastAPI, Node.js, REST APIs, microservices, WebSockets, SQL, PostgreSQL, MySQL, Azure SQL, Firebase
Cloud & Delivery: AWS, RDS, Glue, S3, Azure, GCP, Docker, Jenkins, CI/CD, Git, testing, Agile, AI tools

Projects

PiXMod Live | *Next.js, MongoDB, Stripe, CLIP, SAM, Stable Diffusion*
- Built an AI-powered image platform with Next.js, vision models, and scalable storage, supporting editing, search, and subscriptions while increasing premium conversion by 18%.

FinNexus Live | *Next.js, TypeScript, Plaid, MongoDB, Kubernetes*
- Built a scalable product supporting 50K+ users and 1M+ transactions, combining secure APIs, real-time updates, and dashboards under CI/CD-backed deployment and monitoring.

HMIS Live | *MERN, TypeScript, ABDM APIs, Twilio, Sentry*
- Built a healthcare operations platform with scheduling, alerts, and dashboards, reducing administrative workload by 30% through structured TypeScript services, monitoring, and automation.
