# Sahaj

+91 94280 87331 sahajbhadja1210@gmail.com Seattle, WA

## Summary

Software engineer with 2+ years building **scalable services**, **distributed data workflows**, and **cloud-native APIs** using Python, Java, SQL, and CI/CD in fast-paced Agile teams.

## Education

**University of Southern California, Los Angeles, CA** **August 2024 – May 2026**
*Master of Science in Computer Science* *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies

## Experience

**USC Dornsife** **LA, California**
*Software Engineer* *September 2025 - Present*
- Built **AI-backed backend services** and user-facing data interfaces for 500+ users, reducing latency from **1.2s to 350ms** through query optimization and full-stack integration.
- Implemented **FastAPI orchestration workflows** for 5K+ monthly jobs with validation and issue-logging safeguards, improving production reliability and enabling reusable feature rollout across teams.

**Grad8** **LA, California**
*Software Engineer Intern* *June 2025 - August 2025*
- Developed **React + Flask product features** handling 10K+ daily requests, translating requirements into modular APIs and reusable components deployed through cross-functional sprint delivery.
- Improved release quality and speed via **CI/CD automation** and concurrent processing controls, reducing turnaround time by **60%** while maintaining customer-facing stability.

**USC AD Labs** **Los Angeles, CA**
*ML Research Assistant* *January 2025 - May 2025*
- Built **Python experimentation pipelines** over 100K+ trajectory logs with reproducible runs, structured outputs, and efficient debugging support for iterative model development.
- Produced technical diagnostics and implementation summaries that strengthened decision quality for productionization, improving traceability across model evaluation and engineering handoff cycles.

**Aasma Technology Solutions** **India**
*Software Developer Engineer - (SecureSync)* *August 2023 - July 2024*
- Engineered **API and ETL workflows** with Java/Python OOP, AWS Glue, and S3, improving response times by **30%** while supporting scalable distributed integrations.
- Built and maintained **20+ unit/integration suites** using Jenkins, PyTest, and Mockito across environments, boosting pipeline efficiency by **68%** and reducing technical debt by **20%**.

**Aasma Technology Solutions** **India**
*Full Stack Developer Intern* *May 2023 - August 2023*
- Developed **MERN modules** with REST APIs and WebSockets supporting eight workflows and 2M+ synchronized records, improving service scalability and cross-team maintainability.
- Automated deployment and testing with **Docker** and Jenkins, reducing deployment time by **50%** and improving production consistency across rapid release cycles.

## Skills

**Languages**: **Java**, **Python**, **JavaScript/TypeScript**, C++, SQL
**Frameworks**: React.js, Flask, FastAPI, Node.js
**Cloud & Data**: AWS (S3, Glue, RDS), Azure SQL, PostgreSQL, MongoDB
**Engineering**: **Distributed Systems**, REST APIs, **Microservices**, **CI/CD**, Git, Docker, Kubernetes, Linux
**Testing**: PyTest, Mockito, JUnit, production debugging, technical documentation

## Projects

**FinNexus** Live | *Next.js, TypeScript, Kubernetes, MongoDB*
- Built **scalable full-stack services** for 50K+ users and 1M+ transactions with secure APIs, real-time updates, and Kubernetes-backed reliability aligned with high-traffic product goals.

**Chat2SQL** Code | *Java, TypeScript, SQL, Maven, Docker*
- Developed a **database query assistant** supporting 10+ schemas with validated SQL generation and structured summaries, accelerating analysis workflows while reducing manual query errors.

**Linguistix** | *Python, FastAPI, AWS ECS/Fargate, CodePipeline*
- Developed a **containerized RESTful API** on AWS with automated CI/CD releases, validation checks, and reliable deployment workflows, achieving **87% accuracy** in production data processing.

**PiXMod** | *Next.js, Python, MongoDB, Stripe, Transformers*
- Built an **AI-powered SaaS platform** for image workflows using transformer-based retrieval and segmentation pipelines, processing 1K+ assets with scalable storage, billing, and production-ready API integration.
