Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahaj-bhadja sahaj-bhadja

Summary

Software engineer with 2+ years building **full-stack applications**, **secure APIs**, and **cloud-backed workflows**. Strong in Java, Python, TypeScript, AWS, CI/CD, SQL systems, and AI-assisted development for reliable enterprise software delivery.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – June 2026*
- Architected Azure SQL and Blob-backed services for 500+ users, tuning indexed queries and access patterns to cut dashboard latency from 1.2 seconds to 350 milliseconds across internal analytics workflows.
- Built fault-tolerant job execution for 1,000+ monthly workflows with explicit state transitions, retries, and isolation, improving throughput by 3x while strengthening production debugging, monitoring, and backend reliability under load.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Engineered Flask APIs and React workflows handling 10,000+ daily requests, integrating secure file ingestion, AI-assisted grading operations, and instructor-facing dashboards for maintainable full-stack delivery across production educational systems.
- Designed multithreaded processing pipelines for 1,000+ uploads on AWS RDS-backed services, reducing feedback turnaround by 60% while improving throughput, operational stability, deployment confidence, and backend support for concurrent workloads.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered Python-based API and ETL microservices with AWS Glue, S3, and SQL integrations, improving response times by 30% while supporting reusable backend services, low-bandwidth clients, and maintainable enterprise workflows.
- Maintained Jenkins CI/CD pipelines and 20+ automated suites with PyTest and Mockito, increasing release reliability by 68% while strengthening regression coverage, cross-platform validation, and support for secure production deployments.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built full-stack MERN APIs and WebSocket modules supporting 2M+ synchronized records, improving real-time consistency while keeping eight business services modular, scalable, and easier to maintain across CRM workflows.
- Automated Docker-based CI/CD workflows with Jenkins, staged testing, and deployment validation, cutting release time by 50% while improving troubleshooting speed, build consistency, and delivery reliability for distributed application updates.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built backend APIs for a cross-platform booking application covering reservations, scheduling, and payment-status updates across 50K+ records, supporting real-time service workflows and sub-200 millisecond responses for core transactions.
- Integrated Firebase synchronization, webhook-driven payment flows, and secure access controls, reducing manual refund handling by 70% while improving cross-platform compatibility, operational visibility, and consistency for user-facing booking systems.

Skills

Languages: Java, Python, TypeScript, JavaScript, SQL, C++, Bash; **Frontend**: Angular, React.js, HTML5, CSS3, Next.js, TailwindCSS; **Backend & APIs**: Spring Boot, Flask, FastAPI, Node.js, Express.js, REST APIs, microservices, WebSockets
Cloud & Delivery: AWS, EC2, S3, RDS, AWS Glue, Azure, Azure SQL, Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, Git, Linux; **Data & Practices**: PostgreSQL, MySQL, MongoDB, Firebase, NoSQL, ETL pipelines, PyTest, Mockito, Agile, distributed systems, system design, performance optimization, AI-assisted development

Projects

Chat2SQL Code | *Java, TypeScript, SQL, Docker*
- Built an AI-powered SQL development workspace for 10+ databases, accelerating query authoring and schema exploration through unified Java and TypeScript services with Docker-backed workflows for maintainable enterprise-style data operations.

Linguistix | *Python, AWS, Docker, CI/CD*
- Developed and deployed a containerized RESTful data processing API on AWS with Docker and automated CI/CD releases, adding validation checks and achieving production-grade reliability with 87% processing accuracy.

FinNexus Live | *Next.js, TypeScript, Kubernetes, Plaid*
- Built a scalable fintech platform for 50,000+ users and 1M+ transactions, combining Plaid integrations, secure APIs, WebSocket updates, and Kubernetes-backed deployment workflows for responsive banking-style user experiences.
