Professional Summary

Software engineer with 2+ years of combined full-time, part-time, paid internship, and unpaid internship experience building full-stack applications, REST APIs, cloud services, and data workflows. Experienced with Java, Spring Boot, React, Angular, Python, JavaScript, TypeScript, SQL, microservices, Docker, Jenkins, automated testing, and CI/CD.

Technical Skills

Programming Languages: Java, Python, JavaScript, TypeScript, SQL, C++, Bash
Frontend: Angular, React, HTML5, CSS3, responsive UI development
Backend and APIs: Spring Boot, REST APIs, microservices, Flask, FastAPI, Node.js, WebSockets
Databases: PostgreSQL, MySQL, Azure SQL, SQL Server, Firebase, AWS RDS
Cloud and DevOps: AWS, Azure, Amazon S3, AWS Glue, Docker, Jenkins, CI/CD, Git
Testing: PyTest, Mockito, unit testing, automated testing
Tools and Methodologies: Agile, API design, distributed workflows, performance optimization

Professional Experience

University of Southern California | https://www.usc.edu/ | Los Angeles, California, United States
Software Engineer - Part-Time | Hybrid | September 2025 - June 2026
Payroll Employer: University of Southern California
End Client/Project: USC Dornsife - Internal University Department
Hours: Approximately 20 hours per week
- Built multi-tenant platform services using Azure SQL and Blob Storage for 500+ users, reducing dashboard latency from 1.2 seconds to 350 milliseconds.
- Developed fault-tolerant workflows supporting 1,000+ monthly jobs and improved processing throughput by 3x through explicit state transitions and failure isolation.

Grad8 | https://www.linkedin.com/company/grad8/posts/?feedView=all | Los Angeles, California, United States
Software Engineering Intern - Internship | Hybrid | June 2025 - August 2025
Payroll Employer: Grad8
End Client/Project: [CONFIRM INTERNAL PRODUCT OR EXTERNAL CLIENT]
Hours: Approximately 40 hours per week
- Engineered Flask services, REST APIs, and React workflows handling 10,000+ daily requests, including secure file ingestion and automated grading pipelines.
- Built batch-processing flows for 1,000+ uploaded files using multithreading and AWS RDS-backed services, reducing grading turnaround time by 60%.

Aasma Technology Solutions | https://aasmatech.com/ | Ahmedabad, Gujarat, India
Software Development Engineer - SecureSync | [CONFIRM EMPLOYMENT TYPE] | Hybrid | August 2023 - July 2024
Payroll Employer: Aasma Technology Solutions
End Client/Project: [CONFIRM INTERNAL PRODUCT OR EXTERNAL CLIENT]
Hours: Approximately 40 hours per week
- Developed cross-platform software using microservices, Jenkins, PyTest, and Mockito with 20+ automated test suites across Windows, Linux, and macOS.
- Optimized AWS Glue, Amazon S3, and SQL-backed API and ETL workflows, improving API response time by 30% and pipeline efficiency by 68%.

Aasma Technology Solutions | https://aasmatech.com/ | Ahmedabad, Gujarat, India
Full Stack Developer Intern - VibrantChem | Internship | Hybrid | May 2023 - August 2023
Payroll Employer: Aasma Technology Solutions
End Client/Project: [CONFIRM INTERNAL PRODUCT OR EXTERNAL CLIENT]
Hours: Approximately 40 hours per week
- Built full-stack workflow features with REST APIs, WebSockets, and responsive interfaces supporting more than 2 million synchronized records.
- Automated Docker and Jenkins CI/CD release workflows, reducing release time by 50% while improving deployment consistency.

LST Capitals | https://www.linkedin.com/company/lst-capital/ | India
Web Developer Intern - Unpaid Internship | Hybrid | November 2022 - January 2023

Compensation/Payroll: Unpaid internship - no payroll employer
End Client/Project: [CONFIRM INTERNAL PRODUCT OR EXTERNAL CLIENT]
Hours: Approximately 40 hours per week

- Built Flask backend APIs for a booking application supporting reservations, scheduling, status updates, and payments across 50,000+ records.
- Implemented Flask, Firebase, and webhook-based payment synchronization workflows that reduced manual payment handling by 70%.

Education

University of Southern California | Los Angeles, California
Master of Science in Computer Science | August 2024 - May 2026 | GPA: 3.75/4.00
Relevant Coursework: Algorithms, Databases, Web Technologies, Advanced Natural Language Processing

Pandit Deendayal Energy University | Gandhinagar, Gujarat, India
Bachelor of Technology in Computer Science and Engineering | November 2020 - May 2024 | GPA: 3.88/4.00
Formerly known as Pandit Deendayal Petroleum University | Relevant Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Selected Projects

Chat2SQL | Independent Project - Unpaid | Java, TypeScript, SQL, Docker, Maven | https://github.com/SAHAJ-BHADJA/Chat2SQL

- Built an AI-powered SQL workspace supporting 10+ databases, accelerating query authoring, schema exploration, and data management through a unified Java and TypeScript application.

Linguistix | Independent Project - Unpaid | Python, AWS, Docker, CI/CD

- Developed and deployed a containerized RESTful data processing API on AWS with CI/CD releases and validation checks, achieving 87% accuracy and reliable production behavior.

HMIS Live | Independent Project - Unpaid | MERN, TypeScript, ABDM APIs, Twilio, Sentry | https://hims-rouge.vercel.app/

- Built a healthcare operations platform with scheduling, alerts, and dashboards, reducing administrative workload by 30% through structured TypeScript services, monitoring, and automation.
