Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahaj-bhadja sahaj-bhadja

Summary

Software engineer with 2+ years building **full-stack internal tools**, **secure APIs**, and **real-time workflows**. Strong in React, TypeScript, databases, observability-minded delivery, and maintainable web frameworks.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Analysis of Algorithms, Database Systems, Web Technologies, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, Object-Oriented Programming, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – June 2026*
- Architected **Azure SQL and Blob services** for 500+ users, tuning indexed queries to cut dashboard latency from **1.2 seconds to 350 milliseconds** across internal analytics workflows.
- Built **fault-tolerant job execution** for 1,000+ monthly workflows with retries and isolation, improving throughput by **3x** while strengthening debugging visibility under concurrent production load.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Engineered **Flask APIs** and React workflows handling **10,000+ daily requests**, integrating secure ingestion and AI-assisted operations for context-rich internal grading and review tools.
- Designed **multithreaded processing pipelines** for 1,000+ uploads on AWS RDS-backed services, reducing feedback turnaround by **60%** while improving throughput and operational stability.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered **API and ETL microservices** with Python, SQL, AWS Glue, and S3, improving response times by **30%** while supporting distributed validation and maintainable backend integrations.
- Maintained **Jenkins CI pipelines** and 20+ automated suites with PyTest and Mockito, increasing release reliability by **68%** while improving regression control and deployment confidence.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built **MERN APIs and WebSocket modules** supporting **2M+ synchronized records**, improving real-time consistency while keeping eight business services modular and maintainable.
- Automated **Docker-based CI/CD workflows** with Jenkins and staged validation, cutting release time by **50%** while improving deployment consistency and troubleshooting speed.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built backend APIs for a **cross-platform booking application** covering reservations, time-slot selection, and payment-status updates across **50K+ booking records** with sub-200ms response times.
- Integrated **Firebase synchronization**, webhook-driven payment flows, and secure access patterns, reducing manual refund handling by **70%** and improving cross-platform compatibility by **15%**.

Skills

Languages: **TypeScript**, **Python**, JavaScript, SQL, Java, C++, Bash; **Web & APIs**: React, HTML5, CSS3, REST APIs, WebSockets, Flask, FastAPI, microservices, Ruby on Rails-comparable frameworks, OOP, multithreading, debugging
Data & Delivery: PostgreSQL, MySQL, MongoDB, Firebase, SQL Server, Azure SQL, AWS RDS, S3, AWS Glue, ETL, schema design, query tuning, Git, Docker, Jenkins, CI/CD, PyTest, Mockito, logging, monitoring, dashboards, Agile/Scrum

Projects

HMIS Live Live | *MERN, ABDM APIs, TypeScript, Twilio, Sentry*
- Built a **workflow platform** with ABDM APIs, Twilio alerts, and Sentry monitoring, enabling consent-based history access and reducing administrative workload by **30%**.

FinNexus Live | *Next.js, TypeScript, Kubernetes, Plaid*
- Built a scalable **fintech platform** for **50,000+ users** and **1M+ transactions**, combining secure APIs, member context, and real-time synchronization across deployment workflows.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*
- Built an **AI-powered internal workspace** for **10+ databases**, accelerating query authoring and schema exploration through unified Java and TypeScript services with Docker-backed workflows.
