Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahaj-bhadja sahaj-bhadja

Summary

Software engineer with 2+ years building APIs, SQL-backed services, and web applications. Strong in Python, JavaScript/TypeScript, SQL, testing, and CI/CD.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
M.S. in Computer Science *GPA: 3.75/4*
Coursework: Algorithms, Databases, Web Tech, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
B.Tech. in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Eng., OS, OOP, Data Retrieval

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – Present*
- Architected SQL-backed platform services for 500+ users, tuning indexed queries and worker flows across FastAPI services to cut dashboard latency from 1.2s to 350ms in production.
- Built fault-tolerant orchestration and validation flows for 1,000+ AI tasks and recurring integrations, improving throughput threefold while strengthening release reliability, debugging speed, and operational visibility.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Engineered Flask services, REST APIs, and React workflows handling 10,000+ daily requests, integrating secure uploads, grading history, and instructor-facing features for a high-volume web application.
- Designed concurrent batch-processing for 1,000+ uploaded files using multithreading, AWS RDS, and CI/CD-backed releases, reducing feedback turnaround by 60% while maintaining stable APIs under peak demand.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered API and ETL integrations with Python, SQL, AWS Glue, and S3, improving response time by 30% while supporting scalable service communication and maintainable backend components.
- Maintained 20+ automated tests and Jenkins pipelines with PyTest and Mockito, increasing CI reliability by 68% and strengthening release quality across deployments, debugging, and shared environments.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built full-stack product features with REST APIs, WebSockets, and responsive interfaces, supporting 2M+ synchronized records across modular workflows and reliable end-to-end application behavior.
- Automated Docker-based build and test flows with Jenkins CI/CD, cutting release time by 50% and improving deployment consistency, troubleshooting speed, and engineering collaboration across product environments.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Developed backend APIs for a booking platform covering reservations, scheduling, status updates, and payment workflows across 50,000+ records through maintainable Flask services.
- Integrated payment and synchronization features with Flask, Firebase, and webhooks across 12+ workflow touchpoints, reducing manual payment handling by 70% and improving transaction reliability.

Skills

Languages: Java, Python, JavaScript, TypeScript, SQL, C++, Bash
Backend: Flask, FastAPI, Node.js, Express, REST APIs, WebSockets, SOA, JSON
Frontend: React, Next.js, HTML5, CSS3, TailwindCSS, responsive UI
Data & Infra: PostgreSQL, MySQL, SQL Server, Azure SQL, MongoDB, AWS, Azure, Docker, Jenkins, Git, CI/CD
Engineering: data structures, algorithms, OOP, unit testing, debugging, code reviews, monitoring, scalability

Projects

FinNexus Live | *Next.js, TypeScript, Kubernetes, MongoDB, Plaid*
- Built a secure fintech platform supporting 50,000+ users and 1M+ transactions, combining Plaid integrations, real-time updates, Kubernetes deployment, and scalable MongoDB access for product workflows.

Chat2SQL Code | *Java, TypeScript, SQL, Docker, Maven*
- Built an AI-powered SQL workspace supporting 10+ databases, accelerating query authoring, schema exploration, and data management through a unified Java and TypeScript application.

HMIS Live | *MERN, TypeScript, ABDM APIs, Twilio, Sentry*
- Built a healthcare operations platform with scheduling, alerts, consent-aware access, and dashboards, reducing administrative workload by 30% through TypeScript services, ABDM integrations, monitoring, and responsive workflows.
