Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahaj-bhadja sahaj-bhadja

Summary

Software engineer with 2+ years building **full-stack applications**, **REST APIs**, and **cloud-native microservices**. Strong in Java, Python, TypeScript, AWS/Azure, CI/CD, testing, and customer-facing data workflows.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Algorithms, Databases, Web Technologies

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, OOP

Experience

USC Dornsife
Software Engineer *September 2025 – June 2026*
- Architected **Azure SQL** and Blob-backed services for 500+ users, tuning indexed queries and access patterns to cut dashboard latency from 1.2 seconds to 350 milliseconds across production analytics workflows.
- Built fault-tolerant execution for 1,000+ monthly workflows with state transitions, retries, and isolation, improving throughput by 3x while strengthening **backend reliability** for distributed services.

Grad8
Software Engineer Intern *June 2025 – August 2025*
- Engineered **Flask REST APIs** and React workflows handling 10,000+ daily requests, integrating secure file ingestion and AI-assisted grading for maintainable instructor-facing product workflows.
- Designed multithreaded processing for 1,000+ uploads on **AWS RDS**-backed services, reducing feedback turnaround by 60% while improving operational stability for concurrent production workloads.

Aasma Technology Solutions
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Engineered **Python-based API** and ETL microservices with AWS Glue, S3, and SQL integrations, improving response times by 30% while supporting reusable backend services, low-bandwidth clients, and cloud-native delivery workflows.
- Maintained **Jenkins CI/CD** pipelines and 20+ automated suites with PyTest and Mockito, increasing release reliability by 68% while strengthening regression coverage, integration testing, and deployment quality across distributed services.

Aasma Technology Solutions
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built full-stack **MERN APIs** and WebSocket modules supporting 2M+ synchronized records, improving real-time consistency while keeping eight services modular and scalable across customer-facing workflows.
- Automated Docker-based **CI/CD workflows** with Jenkins, staged testing, and deployment validation, cutting release time by 50% while improving troubleshooting speed, build consistency, and delivery reliability for distributed application updates.

LST Capitals
Web Developer Intern *November 2022 – January 2023*
- Built backend APIs for a cross-platform booking application covering reservations, scheduling, and payment-status updates across 50K+ records, supporting real-time service workflows and sub-200 millisecond responses for core transaction processing.
- Integrated Firebase synchronization, webhook-driven **payment flows**, and secure access controls, reducing manual refund handling by 70% while improving cross-platform compatibility, operational visibility, and consistency for user-facing booking systems.

Skills

Languages: Java, Python, TypeScript, JavaScript, SQL, Bash, C++; **Frontend**: React.js, Angular, HTML5, CSS3, Next.js; **Backend & APIs**: Node.js, Flask, FastAPI, REST APIs, microservices, WebSockets, object-oriented design
Cloud & Data: AWS, Azure, EC2, S3, RDS, AWS Glue, Azure SQL, PostgreSQL, MySQL, MongoDB, Firebase, NoSQL; **Delivery & Practices**: Docker, Kubernetes, Jenkins, GitHub Actions, Git, CI/CD, unit testing, integration testing, Agile, TDD

Projects

FinNexus Live | *Next.js, TypeScript, Kubernetes, Plaid*
- Built a scalable **fintech platform** for 50,000+ users and 1M+ transactions, combining Plaid integrations, secure APIs, WebSocket updates, and Kubernetes-backed deployment workflows for responsive financial-service experiences at scale.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*
- Built an AI-powered SQL development workspace for 10+ databases, accelerating query authoring and schema exploration through unified **Java** and TypeScript services with Docker-backed workflows for maintainable enterprise data operations.

Linguistix | *Python, AWS, Docker, CI/CD*
- Developed and deployed a containerized **RESTful API** on AWS with Docker and automated CI/CD releases, adding validation checks and achieving production-grade reliability with 87% processing accuracy across data workflows.
