Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahaj-bhadja sahaj-bhadja

Summary

Software engineer with 2+ years building consumer-facing full-stack products, clean REST APIs, and reliable data workflows. Strong in React, TypeScript, Python, Node.js, SQL, Git, automated testing, debugging, and rapid production delivery.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Algorithms, Databases, Web Technologies

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, OOP

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – June 2026*
- Built customer-facing React workflows and Azure SQL-backed services for 500+ users, refining indexed queries, access controls, and application behavior to reduce dashboard latency from 1.2 seconds to 350 milliseconds.
- Developed fault-tolerant background workflows for 1,000+ monthly jobs using explicit state transitions, retries, validation, and failure isolation, improving throughput 3x while simplifying production debugging and operational support.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Shipped React features and Flask REST APIs for secure uploads, automated grading, and instructor review, supporting 10,000+ daily requests while maintaining clear interfaces, reusable components, and production-ready behavior.
- Implemented multithreaded processing and AWS RDS persistence for 1,000+ uploaded files per batch, reducing feedback turnaround by 60% while strengthening testing, troubleshooting, and reliability across concurrent user workflows.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Delivered cross-platform product features using Python, SQL, microservices, and Git workflows, adding 20+ PyTest and Mockito suites that improved release confidence across Windows, Linux, and macOS environments.
- Optimized REST API and data workflows with object-oriented patterns, AWS Glue, S3, and SQL processing, improving response times by 30% and pipeline efficiency by 68% for production services.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built responsive MERN product workflows with React, REST APIs, WebSockets, and modular Node.js services, supporting 2M+ synchronized records while improving real-time updates and daily coordination for distributed users.
- Automated Docker-based testing and deployment workflows with Jenkins CI/CD, cutting release time by 50% while improving build consistency, regression coverage, and troubleshooting for frequent customer-facing application changes.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built Flask APIs for a consumer booking application covering reservations, scheduling, payment status, and user workflows across 50,000+ records, enabling reliable feature delivery and cleaner downstream data handling.
- Integrated Firebase updates, payment synchronization, and webhook-based status handling, reducing manual payment work by 70% while improving debugging visibility, operational consistency, and user confidence in daily transaction workflows.

Skills

Languages: JavaScript, TypeScript, Python, Java, SQL, C++, Bash; **Frontend**: React.js, Next.js, HTML5, CSS3, Tailwind CSS, responsive design; **Backend & APIs**: Node.js, Express.js, Flask, FastAPI, REST APIs, WebSockets, microservices
Data: PostgreSQL, MySQL, Azure SQL, SQL Server, MongoDB, Firebase, AWS RDS; **Engineering**: Git, GitHub, pull requests, code reviews, unit testing, integration testing, PyTest, Mockito, debugging, documentation, Agile/Scrum, Docker, Jenkins, GitHub Actions, CI/CD, AWS, Azure

Projects

PiXMod Live | *Next.js, TypeScript, React, Tailwind CSS, Clerk*
- Built a responsive AI image-editing SaaS with reusable React components, authenticated user workflows, credit-based usage, and Stripe subscriptions, delivering a polished consumer experience across desktop and mobile interfaces.

FinNexus Live | *Next.js, TypeScript, React, Plaid, Kubernetes*
- Built a scalable fintech platform for 50,000+ users and 1M+ transactions, combining secure APIs, Plaid-based bank linking, real-time updates, and Kubernetes-backed deployments for reliable customer-facing financial workflows.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*
- Built an AI-powered SQL workspace supporting 10+ databases, accelerating query authoring, schema exploration, and data management through a unified Java and TypeScript codebase with Docker-backed local development workflows.
