Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahaj-bhadja sahaj-bhadja

Summary

Software engineer with 2+ years building database-backed business applications, APIs, and automation workflows. Strong in Python, Java, JavaScript/TypeScript, SQL, AWS/Azure, testing, debugging, and production support for reliable software systems.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Algorithms, Databases, Web Technologies

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Operating Systems, OOP

Experience

USC Dornsife **Los Angeles, CA**
Software Engineer *September 2025 – June 2026*
- Architected Azure SQL and Blob-backed platform services for 500+ users, tuning indexed queries, schema design, and access paths to cut dashboard latency from 1.2 seconds to 350 milliseconds across production workflows.
- Built fault-tolerant data and job pipelines for 1,000+ monthly workflows using retries, validation checks, and failure isolation, improving throughput 3x while strengthening debugging, reliability, and production support for recurring operations.

Grad8 **Los Angeles, CA**
Software Engineer Intern *June 2025 – August 2025*
- Engineered Flask APIs and React workflows for AI-assisted grading, secure file ingestion, and instructor review, supporting 10,000+ daily requests while maintaining clean interfaces, documented logic, and reliable full-stack behavior.
- Developed multithreaded processing and AWS RDS-backed persistence for 1,000+ uploads per batch, reducing feedback turnaround by 60% while improving testability, operational stability, and troubleshooting across concurrent production workloads.

Aasma Technology Solutions **India**
Software Developer Engineer - (SecureSync) *August 2023 – July 2024*
- Developed cross-platform software with microservices, automated builds, and 20+ unit and integration suites using Jenkins, PyTest, and Mockito, improving release confidence and debugging speed across Windows, Linux, and macOS environments.
- Optimized API and ETL workflows with OOP patterns, AWS Glue, S3, and SQL-based processing, improving response times by 30% and pipeline efficiency by 68% for maintainable production data operations.

Aasma Technology Solutions **India**
Full Stack Developer Intern - (VibrantChem) *May 2023 – August 2023*
- Built a MERN resource-management platform with REST APIs, WebSockets, and modular services, supporting 2M+ synchronized records while simplifying code-review workflows, real-time updates, and day-to-day business coordination across distributed teams.
- Automated Docker-based CI/CD testing and deployments with Jenkins, cutting release time by 50% while improving build consistency, validation coverage, and troubleshooting for frequent application changes and production rollouts.

LST Capitals **India**
Web Developer Intern *November 2022 – January 2023*
- Built backend APIs for a service-booking application covering reservations, scheduling, payment status, and user workflows across 50K+ records, enabling reliable business-process execution and cleaner downstream data handling.
- Integrated payment synchronization, Firebase-backed updates, and automated status handling, reducing manual payment work by 70% while improving debugging visibility, operational consistency, and stakeholder confidence in daily transaction flows.

Skills

Languages: Python, Java, JavaScript, TypeScript, SQL, C++, Bash; **Backend**: Flask, FastAPI, Node.js, Express.js, REST APIs, WebSockets, microservices, OOP; **Frontend**: React.js, Next.js, HTML, CSS, TailwindCSS
Data & Databases: Azure SQL, SQL Server, PostgreSQL, MySQL, MongoDB, Firebase, AWS RDS, AWS Glue, S3; **Testing & Delivery**: PyTest, Mockito, unit testing, integration testing, Jenkins, GitHub Actions, Docker, Git, CI/CD, debugging, documentation, Agile/Scrum

Projects

HMIS Live | *MERN, TypeScript, ABDM APIs, Twilio, Sentry*
- Built a microservice-based healthcare platform with ABDM APIs, consent-driven record access, and Twilio alerts, supporting 100+ daily appointment workflows while improving patient-history retrieval speed and administrative efficiency.

Chat2SQL Code | *Java, TypeScript, SQL, Docker*
- Built an AI-powered SQL workspace supporting 10+ databases, accelerating query authoring, schema exploration, and data management through a unified Java and TypeScript codebase with Docker-backed local development workflows.

FinNexus Live | *Next.js, TypeScript, Kubernetes, Plaid*
- Built a scalable fintech platform for 50,000+ users and 1M+ transactions, combining secure APIs, Plaid-based bank linking, and real-time updates with Kubernetes-backed deployment workflows for reliable customer-facing operations.
