Sahaj Bhadja

(213) 284-4651 bhadja@usc.edu sahaj-bhadja sahajbhadja sahaj-bhadja

Summary

Software Developer with 2+ years building **Python/FastAPI** services, **React**/TypeScript interfaces, and **SQL** databases, with data integrations, reconciliation, secure handling of sensitive records, and AI-assisted development.

Education

University of Southern California, Los Angeles, CA **August 2024 – May 2026**
Master of Science in Computer Science *GPA: 3.75/4*
Coursework: Database Systems, Web Technologies, Analysis of Algorithms, Advanced NLP

Pandit Deendayal Energy University, Gandhinagar, India **November 2020 – May 2024**
Bachelor of Technology in Computer Science and Engineering *GPA: 3.88/4*
Coursework: Software Engineering, Object-Oriented Programming, Data Retrieval, Operating Systems

Experience

USC Dornsife **September 2025 – Present**
Software Engineer *Los Angeles, CA*
- Designed normalized **SQL schemas** on Azure SQL and PostgreSQL with row-level security protecting each tenant's records for 500+ users, cutting dashboard latency from 1.2s to 350ms through query tuning.
- Built **FastAPI** data integrations across PostgreSQL, SQL Server, and cloud storage with validation, reconciliation checks, and incremental loads, running 5K+ monthly jobs at 99%+ reliability through CI/CD releases.

Grad8 **June 2025 – August 2025**
Software Engineer Intern *Los Angeles, CA*
- Built an internal application with **React** views and Flask REST APIs for uploads, grading history, and question management, serving 150+ instructors and 10K+ daily requests with 60% faster feedback.
- Designed normalized **MySQL** tables for users, questions, answers, and model usage logs on AWS RDS, and shipped changes through GitHub Actions pull-request CI/CD with secure file ingestion for 1K+ files.

Aasma Technology Solutions **August 2023 – July 2024**
Software Developer Engineer – SecureSync *India*
- Troubleshot and optimized large-scale **API integrations** with indexing, caching, and pagination, improving response times 30%, and wrote 20+ unit and integration test suites run nightly in Jenkins.
- Gathered requirements with Microsoft and GitHub **stakeholders** in Agile sprints and delivered from analysis through deployment, while a redesigned AWS Glue and S3 ETL boosted pipeline efficiency 68%.

Aasma Technology Solutions **May 2023 – August 2023**
Full Stack Developer Intern – VibrantChem *India*
- Built a TypeScript and React **CRM** with customer profiles, interaction history, invoices, payments, and lead tracking on Node.js REST APIs, syncing 2M+ records across locations in real time.
- Modeled customer, invoice, and payment data in Azure SQL with **encryption**, firewalls, and role-based access, and automated Jest and Selenium tests in Jenkins CI/CD at 95%+ build validation.

LST Capitals **November 2022 – January 2023**
Web Developer Intern *India*
- Integrated PCI-compliant multi-currency **payment** providers across cards, UPI, wallets, and PayPal with idempotent webhooks for refunds, disputes, and chargebacks, keeping payment status consistent and cutting manual payment handling by 70%.
- Translated client **requirements** into an end-to-end architecture with 12+ integration points, then built Python Flask APIs with coupon and pricing calculation logic and sub-200ms latency across 50K+ records.

Skills

Languages: Python, TypeScript, JavaScript, SQL, Java, HTML, CSS
Web & APIs: React, Next.js, FastAPI, Flask, Node.js, REST APIs, OpenAPI, Webhooks
Databases: PostgreSQL, SQL Server, Azure SQL, MySQL, MongoDB, Schema Design, Query Optimization, Reporting
Cloud & DevOps: Microsoft Azure, AWS, GCP, Git, Pull Requests, GitHub Actions, Jenkins, CI/CD, Docker
Quality & Security: Unit Testing, Integration Testing, Jest, PyTest, Code Reviews, Debugging, Row-Level Security, Encryption, RBAC
Practices: Claude Code, Requirements Gathering, Technical Documentation, Agile

Projects

Custodial Data Reconciliation Tool | *Python, FastAPI, PostgreSQL, React, TypeScript, PyTest*
- Designed a FastAPI and React tool that imports custodian position and transaction files, **reconciles** them against portfolio records with rule-based break detection, and masks client identifiers in audit logs.

FinNexus Live | *Next.js, TypeScript, MongoDB, Plaid, Kubernetes*
- Built a **fintech** platform in TypeScript and Next.js with Plaid bank linking, a token-based firewall protecting transaction data, and advanced filtering across 1M+ transactions for 50K+ users.

Chat2SQL Code | *Java, TypeScript, SQL Server, PostgreSQL, Docker*
- Extended an AI-assisted SQL workspace on Java and TypeScript supporting 10+ databases, generating schema-aware queries at 82% accuracy with validated execution and AI-generated **reporting** dashboards for faster data exploration.
